1. READ THIS FIRST

Welcome to the IPDRS application. This section is primarily intended for new readers by introducing key information about the purpose and format of the document.

1.1 Application name is CIDB International Project Database System (IPDRS)

The main functions of the current CIDB International Project Database is to allow public users to gain in depth information relating to overseas contraction projects by giving the users the ability to perform data mining by querying project details, project summary and monitor project statuses overseas. Though system does not function as expected as many features are incomplete or do not work. User can search for projects details based on limited criteria and system does not function as expected.

The objective of this requirement is:

- System should excite and encourage the users who are not IT/Tech savvy to use the system.
- System should be intuitive, easy to use.
- System should increase the efficiency and effectiveness of CIDB by providing better project data representation.

1.2 What is the Purpose of This Manual?

This manual is a User's Manual for the user interfacing with IPDRS system. Its main purpose is to provide a detail definition of the operation of the function that user can perform to manage IPDRS system. Its secondary purpose is to provide a definition of the basic concepts and terms that are used in the process of operating the IPDRS system. The purpose of this manual is to document the forms (screens), topical essays on specific business processes and any other reference information that would assist the users in operating the application system.

1.3 Audience

This document is intended for any users of the IPDRS system. This will serve as the user guide for running the IPDRS system.

1.4 Accessing the Application

To access the IPDRS Application uses the following URL 'http://apps.cidb.gov.my/international'**.**

2. USER ADMINISTRATION

IPDRS system uses RBAC approach to implement User Administration module. RBAC (Role-Based Access Control) is an approach of restricting system access to authorized users. RBAC will limit particular user to its particular role and particular set of actions.

The advantages of using RBAC approach are:

1. Role assignment: a subject can execute a transaction only if the subjects has selected or been assigned a role.
2. Role authorization: a subject's role must be authorized for the subject. With rule 1 above, this rule ensures that users can take on only roles for which they are authorized.
3. Transaction authorization: a subject can execute a transaction only if the transaction is authorized for the subject's role. With rule 1 and 2 above, this rule ensures that users can execute only transactions for which they are authorized.

User Administration in IPDRS system plays important role in maintaining properties of user and managing level of authentication and authorization. The term"Edit" here means creation, alteration and deletion of tables. In IPDRS, the tables for user administration will be:

- User table,
- Role table and
- Permission

Only IPDRS Administrator has access to manage User Administration, whereas others don't have this privilege.

2.1 Authorization

Authorization is the process of giving someone permission to do or have something a system administrator defines for the system which users are allowed access to the system and what privileges of use.

In IPDRS system list of roles that identified as follows:

- Public Users
- IPDRS Administrator
- Contractors

Permissions in IPDRS system are:

- View
- Add/Edit/Delete

The term "Edit" here means creation, alteration and deletion of tables.

Each role has different permission to the system. Each user will be mapped only to one role.

Here is the example of user administration matrix. This is configurable.

Role	Module	Permission
Public Users	Tender Announcements	View/Search/Download
	Registration Form	Register
	Contact Info	View
	Reports	View/Export/Print
IPDRS Administrator	Master Data	
	• Companies	Search/Add/Edit/Delete
	• Company Category	Add/Edit/Delete
	• Project Categories	Add/Edit/Delete
	• Projects	Search/Add/Edit/Delete
	• Project Status	Add/Edit/Delete
	• Countries	Add/Edit
	• Currency Exchange	Search/Export
	• Procurements	Add/Edit/Delete
	• Audit Interface	View

Table 1.1 User administration matrix sample

3. USER INTERFACE FEATURE

3.1 Standard Feature

Reliable has a standard on Master data Administration. This is a very comprehensive and feature rich standard which will be extended to the IPDRS project. We provide some User Friendly Features to user. These features are described below:-

1) Pagination
2) Display of no of rows info
3) Selectable no of rows to display in a page
4) ~~Search on searchable fields~~
5) ~~Selectable search on fields~~
6) ~~Export to CSV~~
7) Add new Data
8) Edit Existing Data
9) Delete Existing Data
10) Listing of Data
11) Context sensitive menu for master data operation (add, edit, delete)
12) Any column sorting on any order asc/desc
13) Hide and show columns

Exp Result:

1) Pagination :-

By using Pagination feature user can move to next page, previous page, first page, and last page. We also provide text field to enter direct page number.

Screenshot:

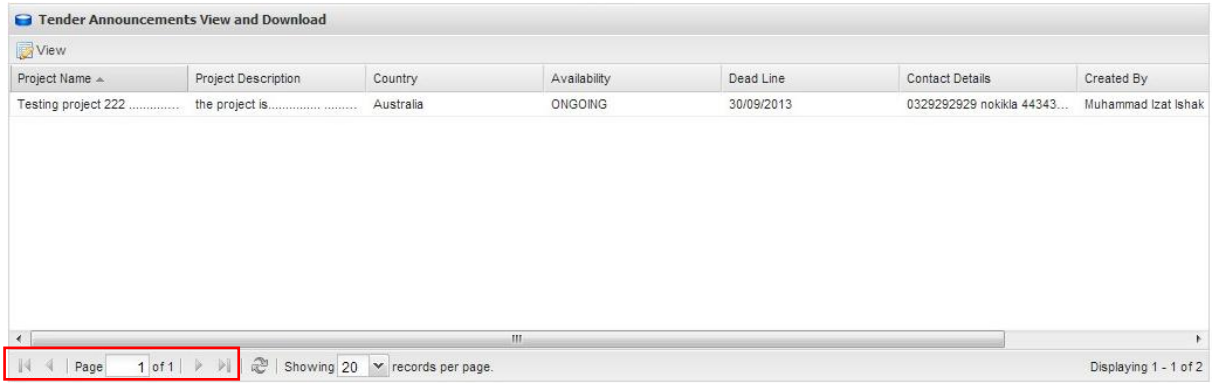

Figure 1.2: Pagination feature

2) **Display of no of rows info** :-

This will specify how many records are displayed and how many records are in DB.

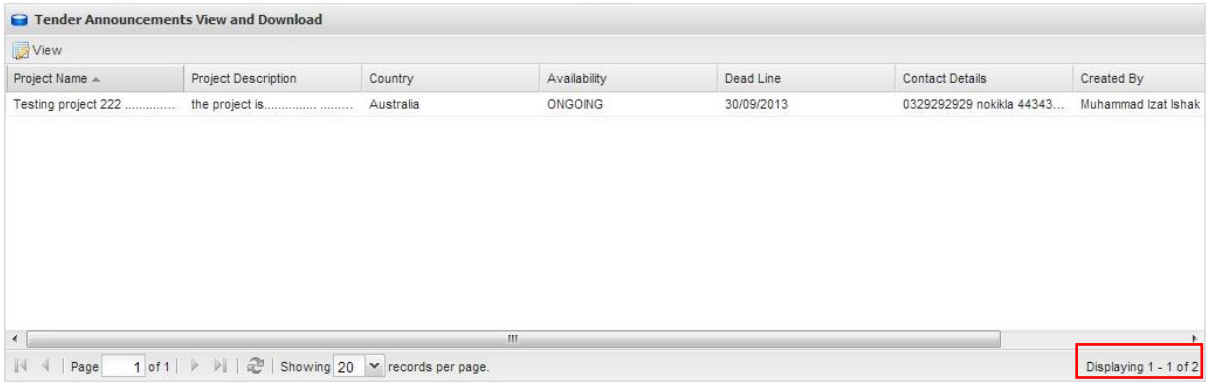

Figure 1.3: Records Number

3) Selectable no of rows to display in a page :-

This feature allows the user to display the no of records in a page and we provide option box to choose record. User thus has the flexibility to control how many records are to be displayed in one page.

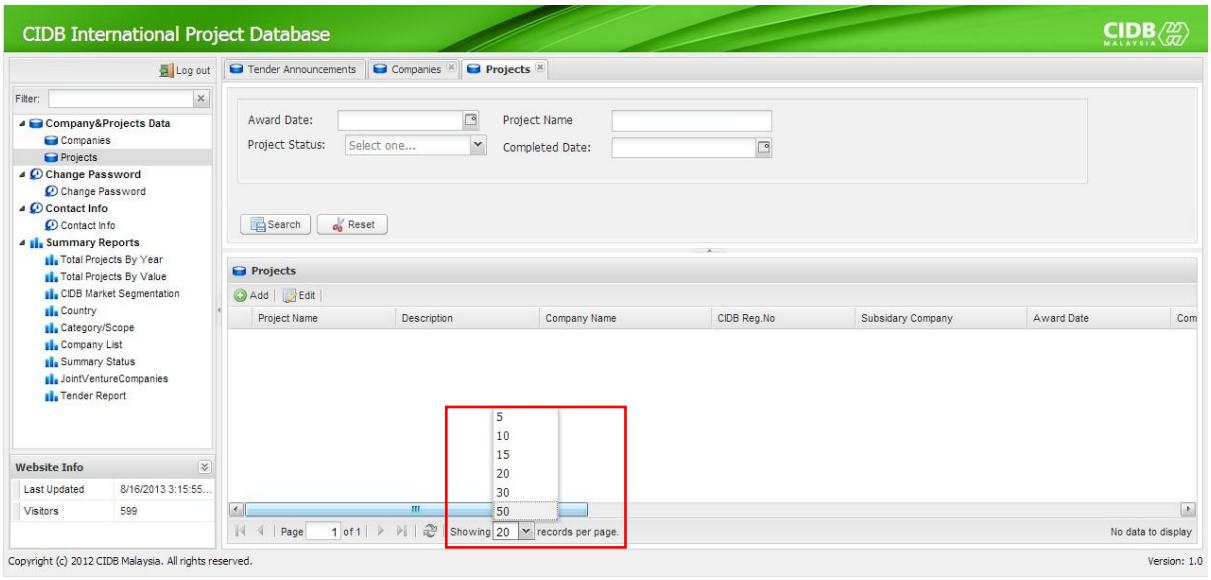

Figure 1.4: Records Number Setting

4) Add new Data :-

If user want to add new record then clicks on the Add button to popup the below dialog box.

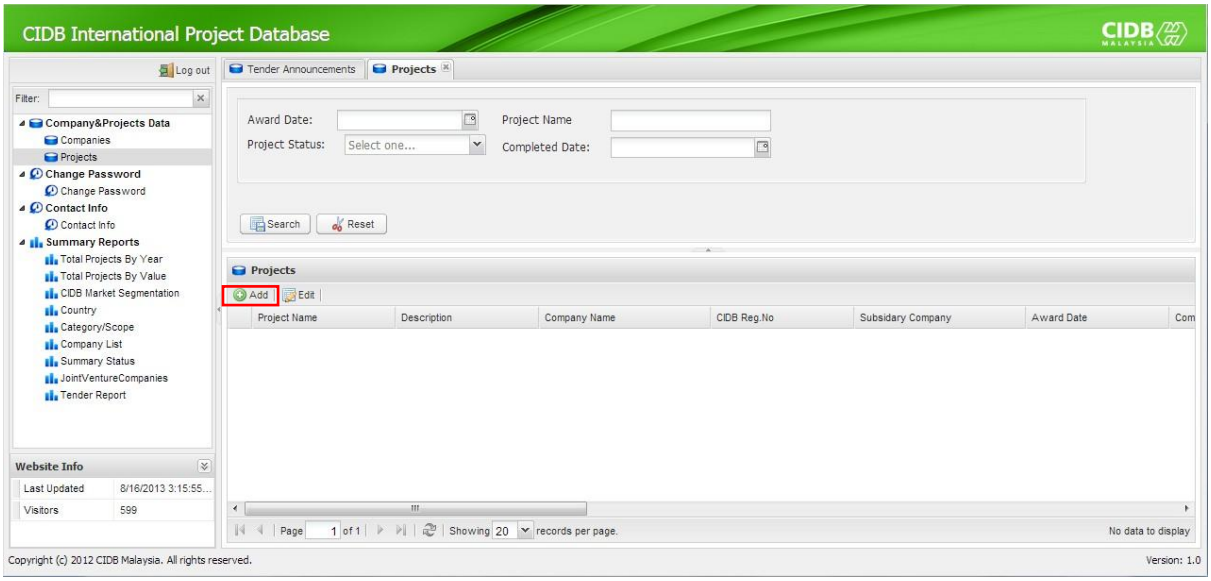

Figure 1.7: Add new record

5) Edit Existing Data :-

User can edit any record by clicks on edit button and make sure u need to select one record before editing any record.

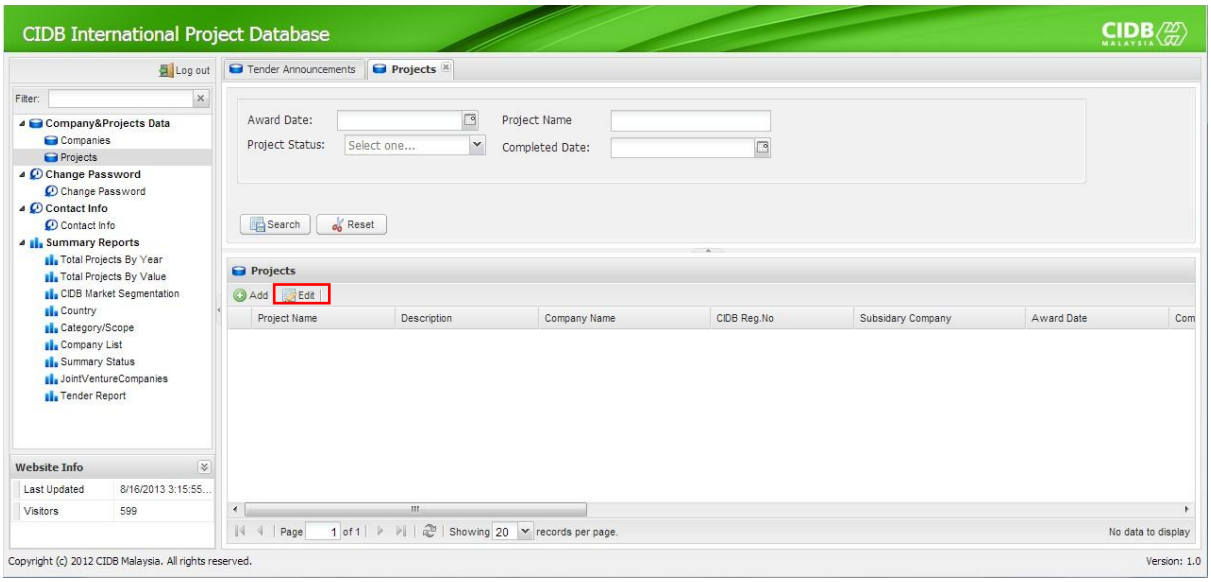

Figure 1.8: Edit existing record

6) Delete Existing Data :-

User can delete any record by clicks on delete button and make sure u need to select one record before deleting any record.

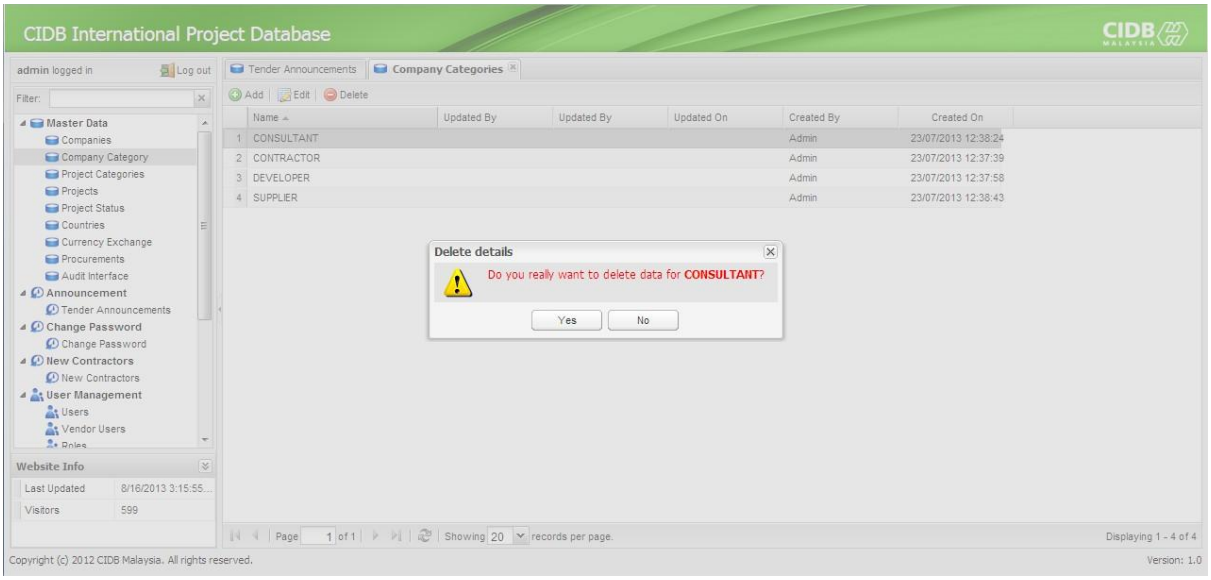

Figure 1.9: Popup message warning while deleting record

7) Listing of Data :-

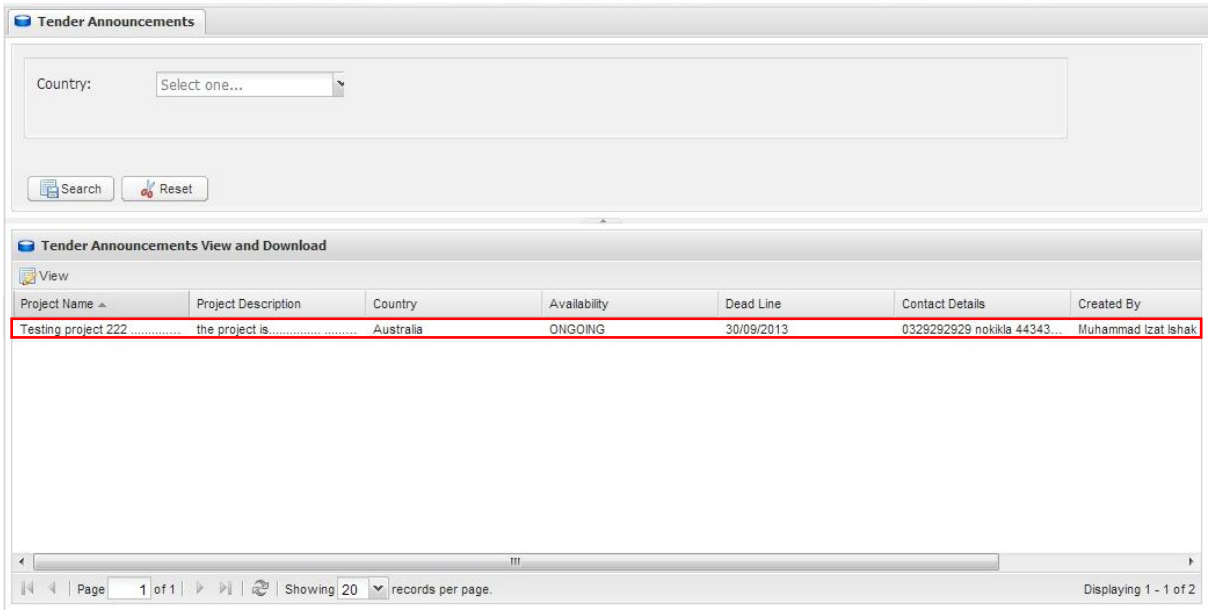

Figure 1.10: List of records

8) Context sensitive menu for master data operation (Add, Edit, Delete) :-

It's another simplified option to user to add/edit/delete record by simply right clicks on any record to appear one popup.

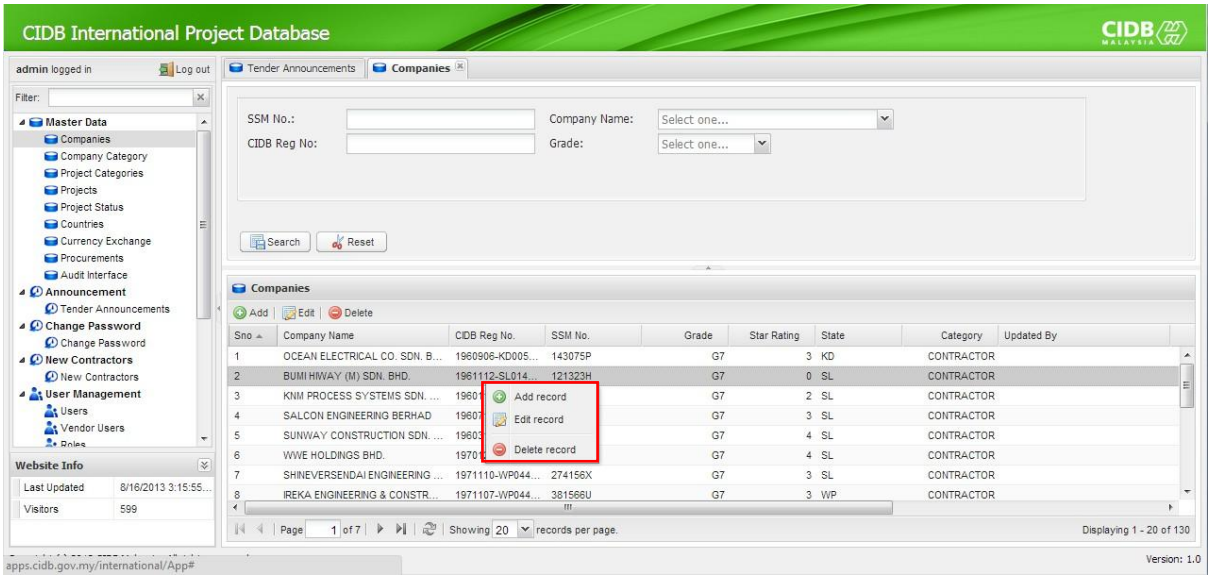

Figure 1.11: Context sensitive menu

9) Any column sorting on any order ASC/DESC :-

By using the feature user can easily sort any column , sorting can be in Ascending Order/Descending Order.

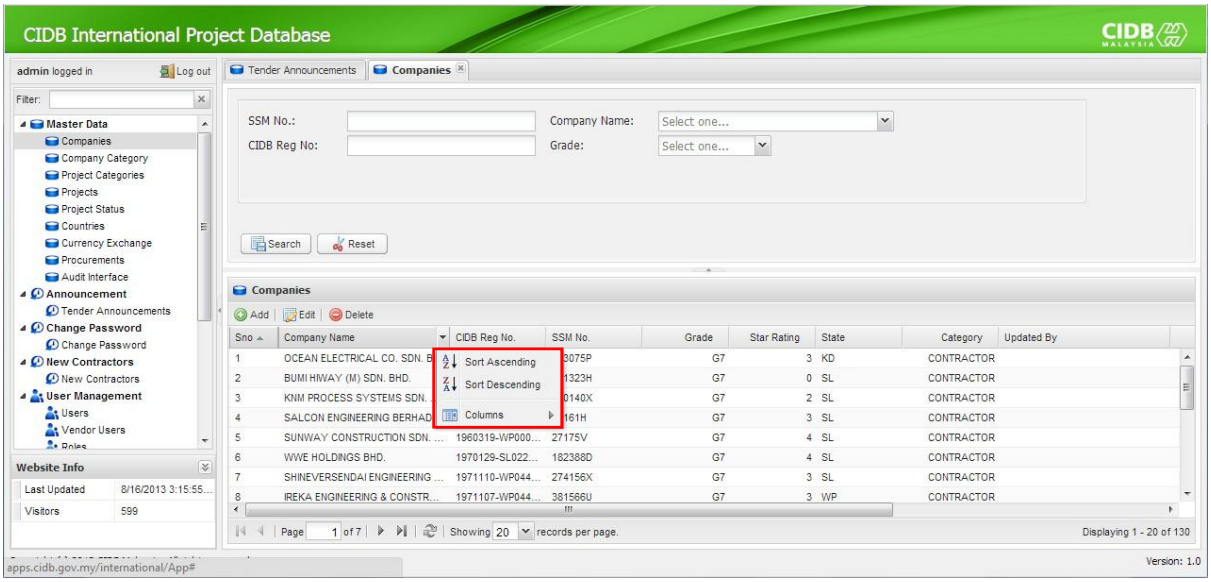

Figure 1.12: Sorting feature

10) Hide and show columns :-

If u doesn't want any column u can hide.

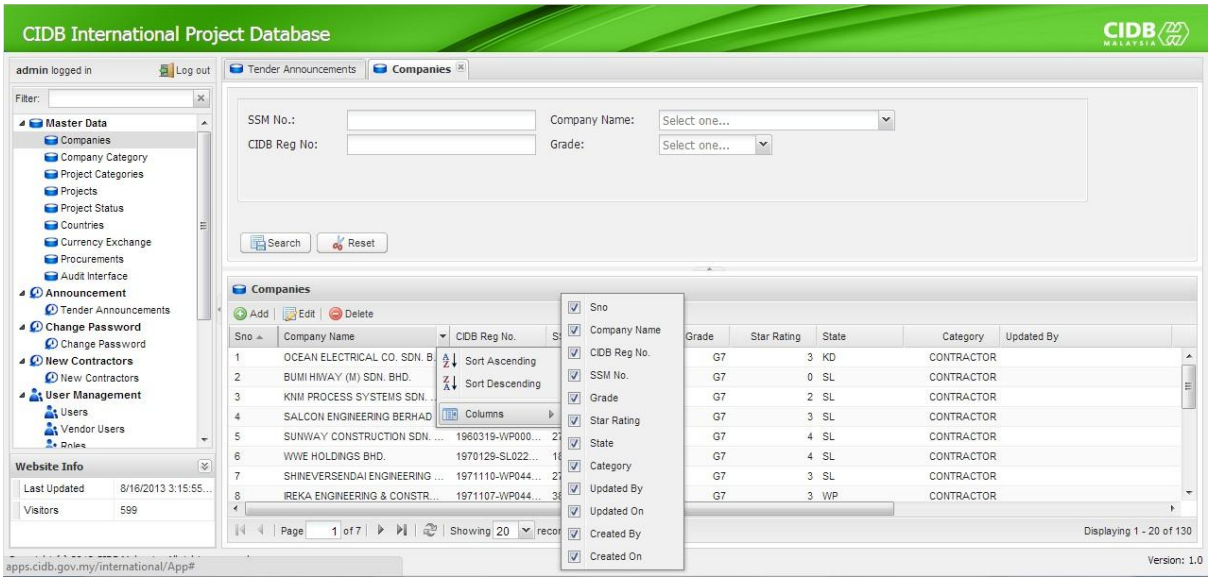

Figure 1.13: Hide/Show Columns feature

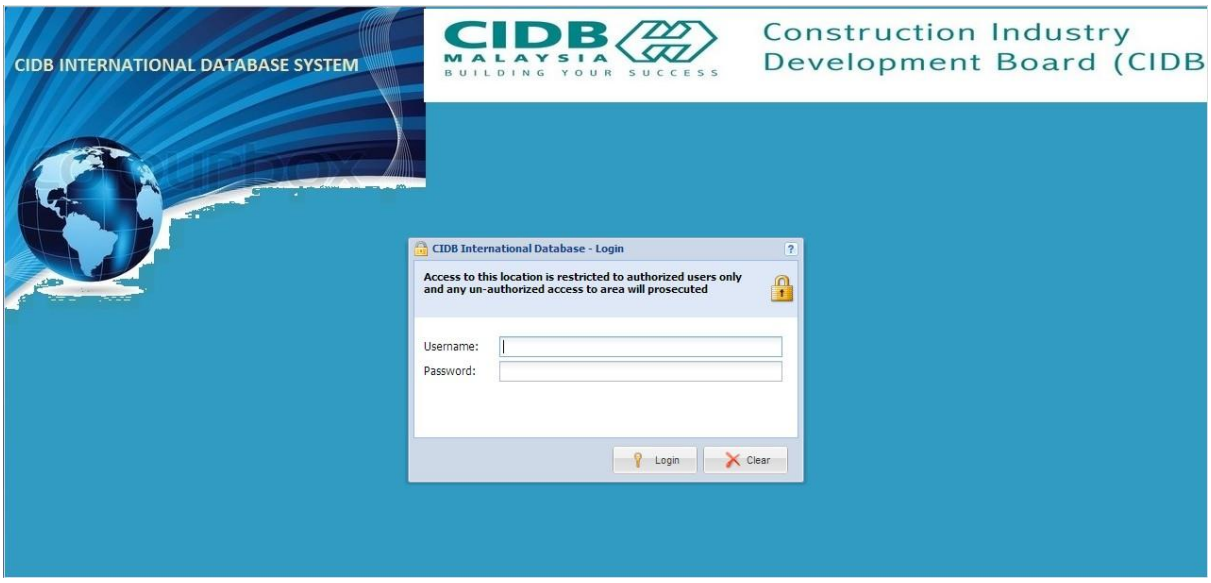
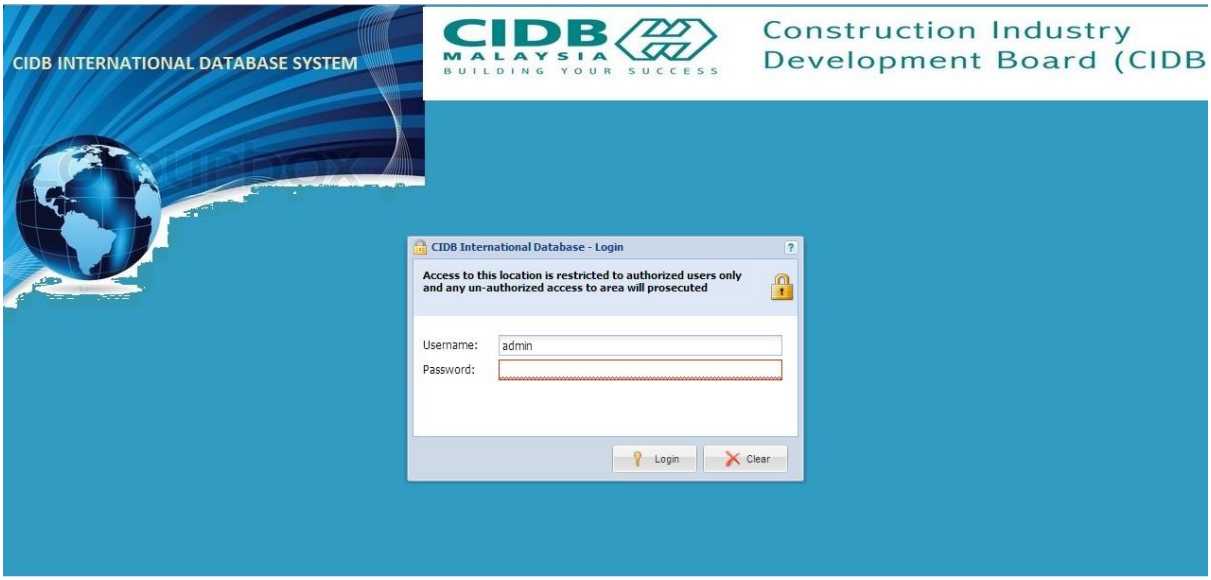
3.2 Screen Login

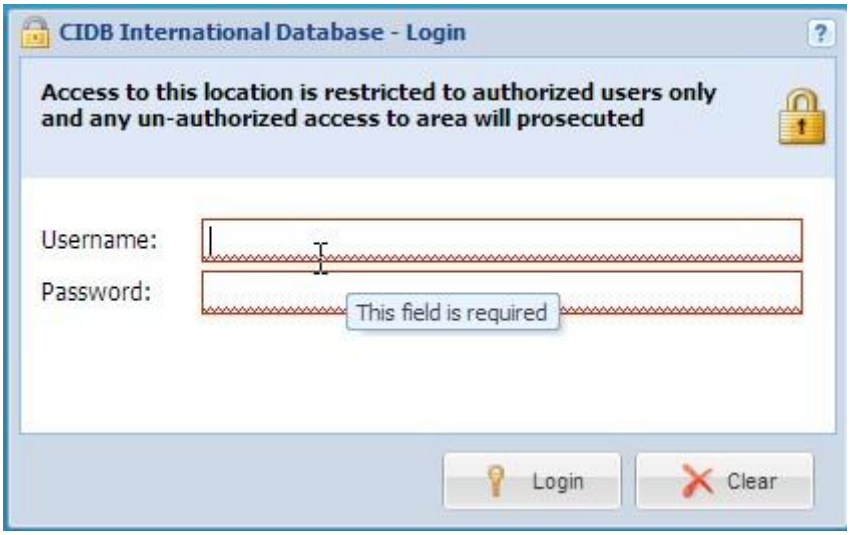
Screen login is for user which provide system authentication. User should enter correct username and password in order to access IPDRS System.



The main login screen.



Username and Password are mandatory to be filled up. Mandatory fields were marked with an asterisk.

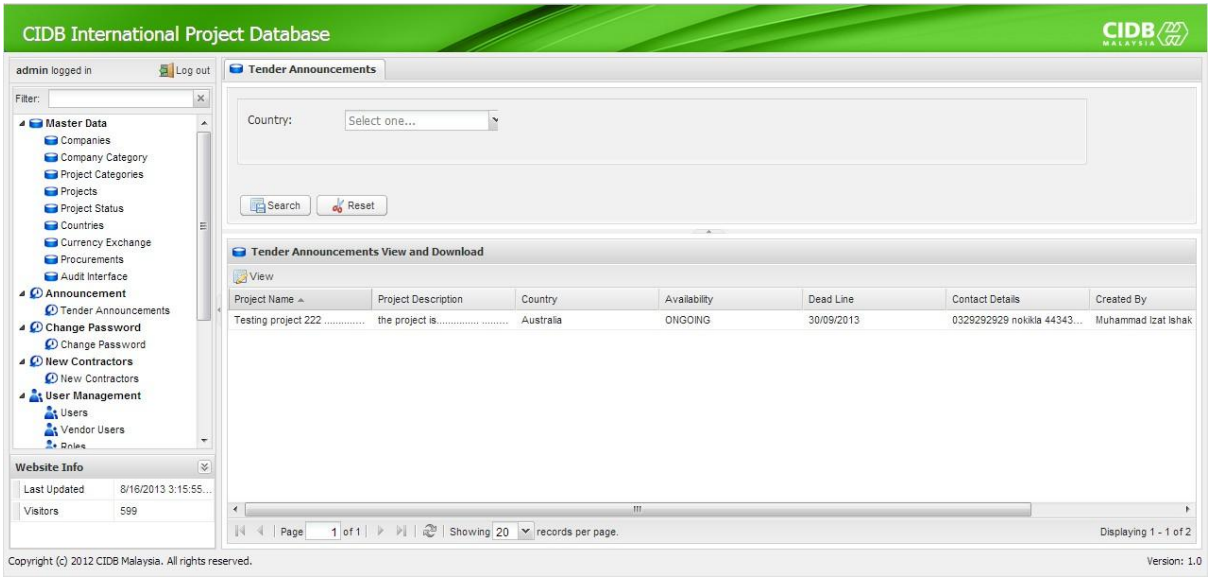


CIDB International Database - Login
Access to this location is restricted to authorized users only and any un-authorized access to area will prosecuted
Username:
Password:
This field is required
Login
Clear

When user clicks on Login without inserting any data, the mandatory field will be remarked with red color as warning that it is mandatory field and user need to insert data before clicks on Login button.

If user entering incorrect username or password, system will give an alert.

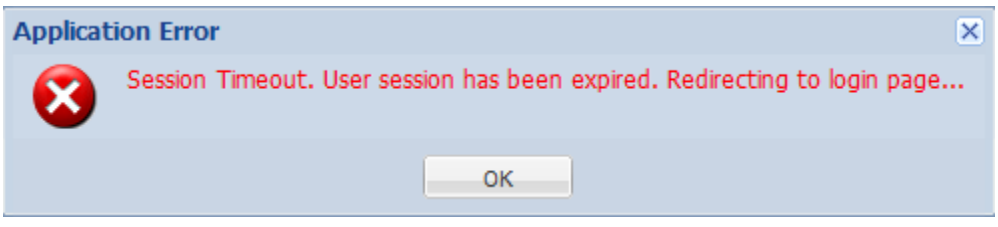
Then, user need to re enter again the correct info.



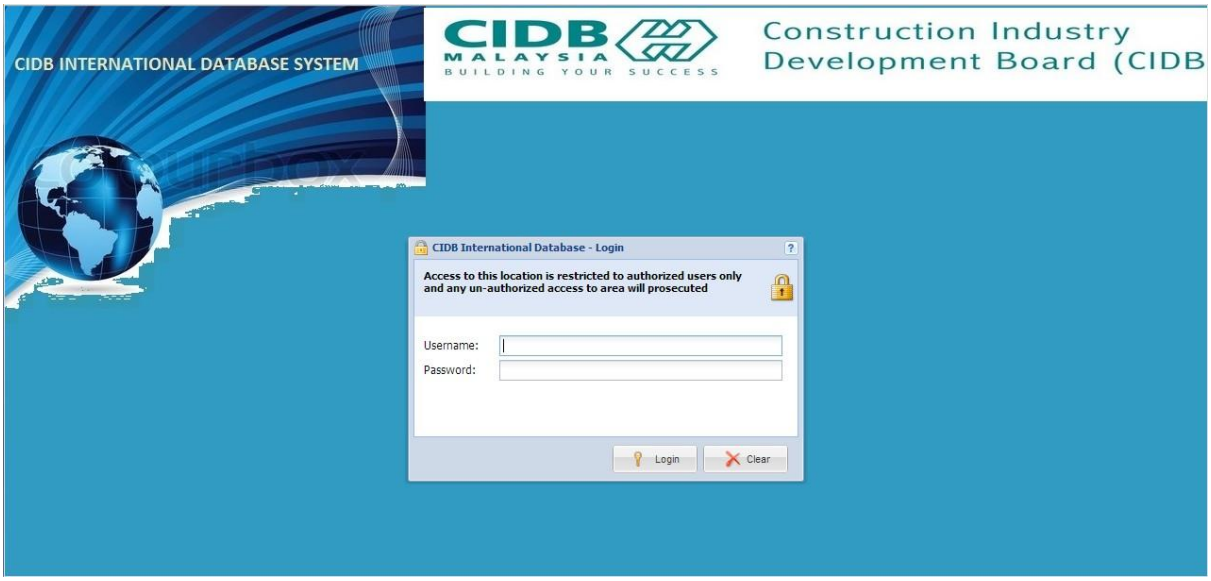
If authentication page is pass and correct, system will bring user to main page of IPDRS System screen.

3.3 Session Timeout

In IPDRS System, session time for user is 30 minutes. If user is idle within that period, system will warn user to re login into the system again once user clicks on any tree menu or any button.



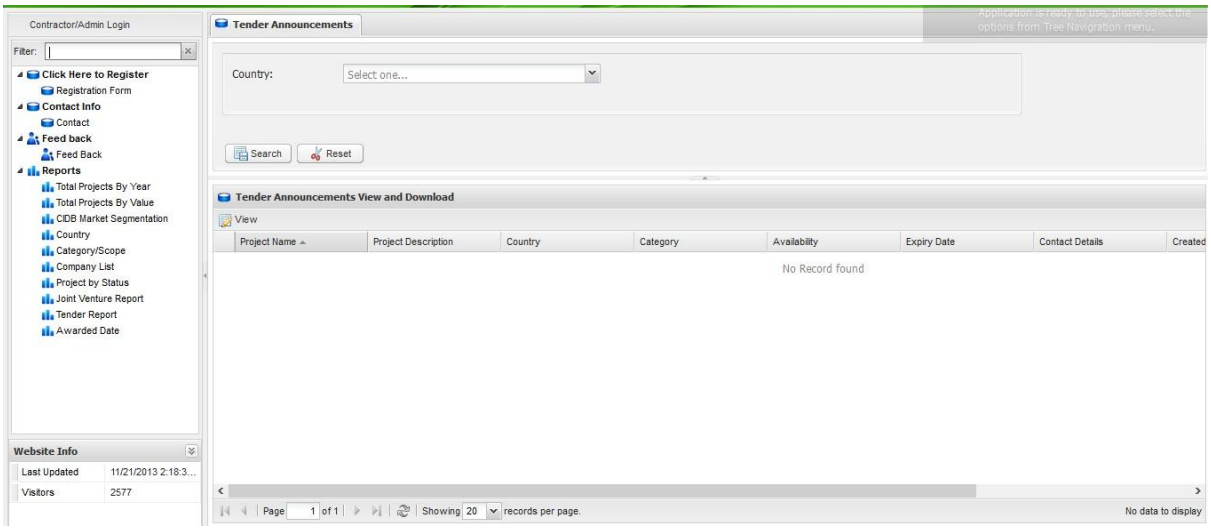
User will receive Warning message as above from the system if user session is expired.



CIDB INTERNATIONAL DATABASE SYSTEM
CIDB MALAYSIA
BUILDING YOUR SUCCESS
Construction Industry Development Board (CIDB
CIDB International Database - Login
Access to this location is restricted to authorized users only and any un-authorized access to area will prosecuted
Username:
Password:
Login
Clear

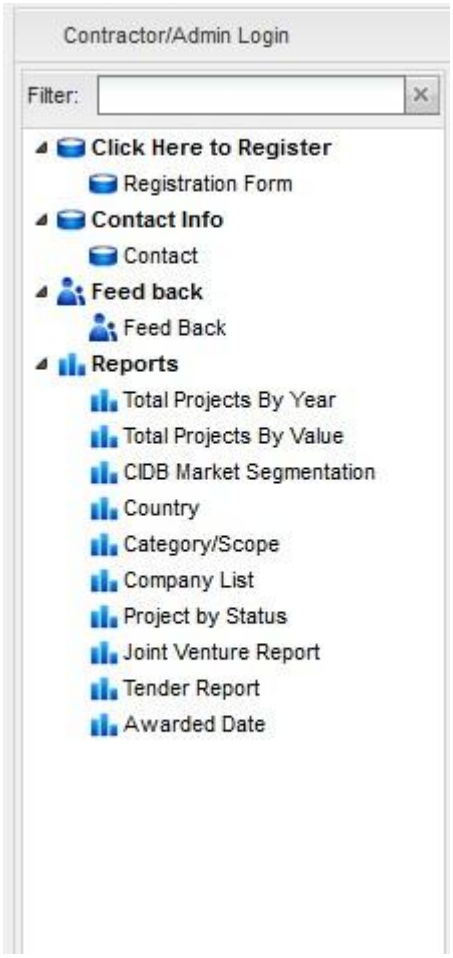
Upon user clicks on OK button, system will redirect user back to login page and user need to re login in terms to using IPDRS System.

3.4 Whole Page

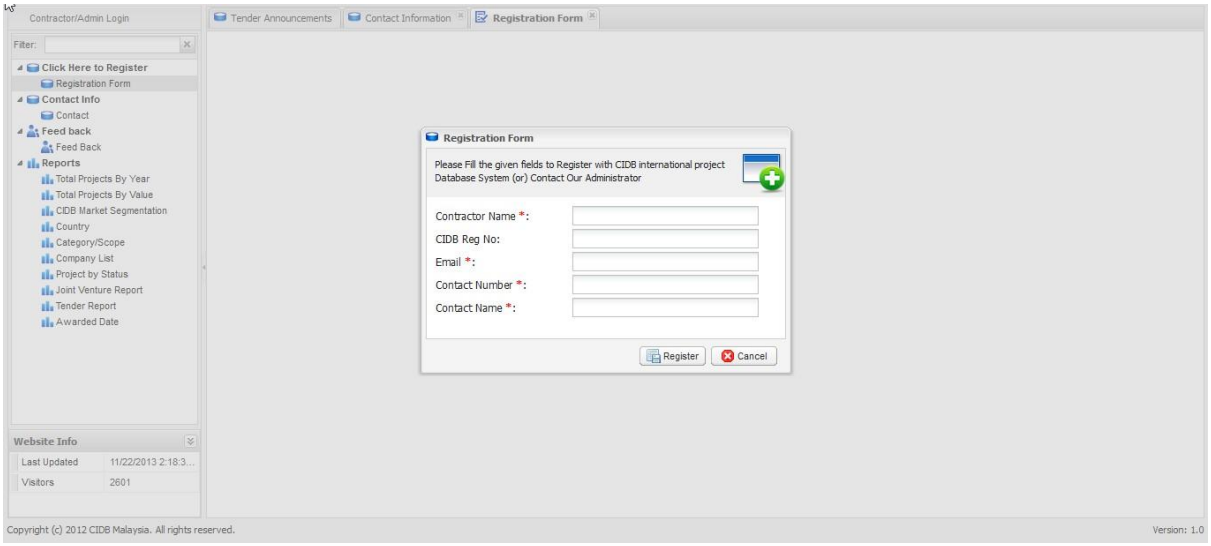


This is the main page of IPDRS System. From this main screen, user can see several menus on the left side.

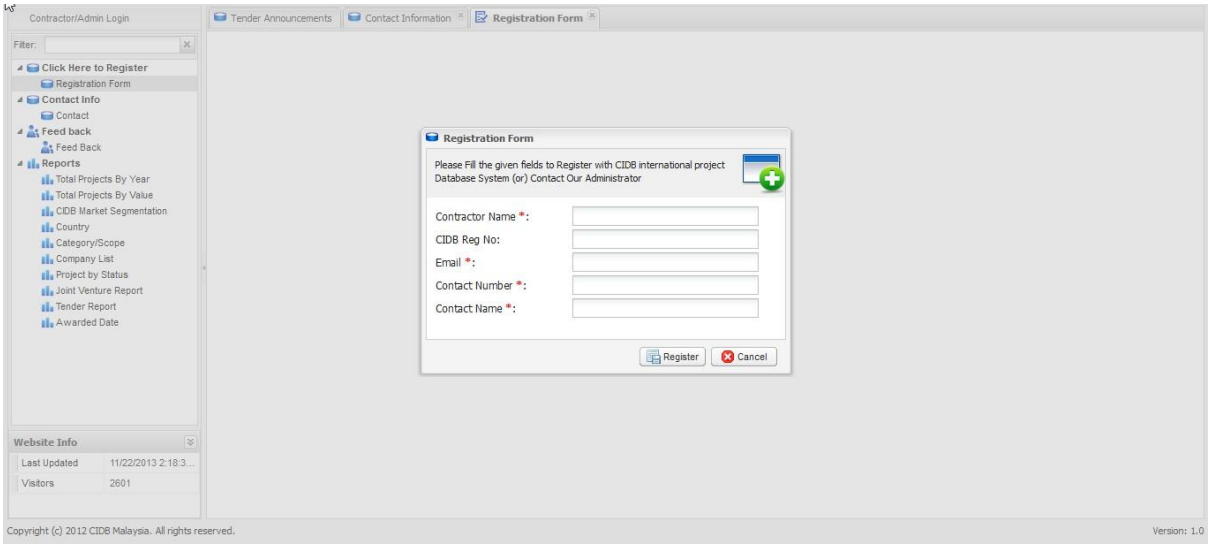
This is the header or the upper menu of the main page.



Some of menus provided in the left side.

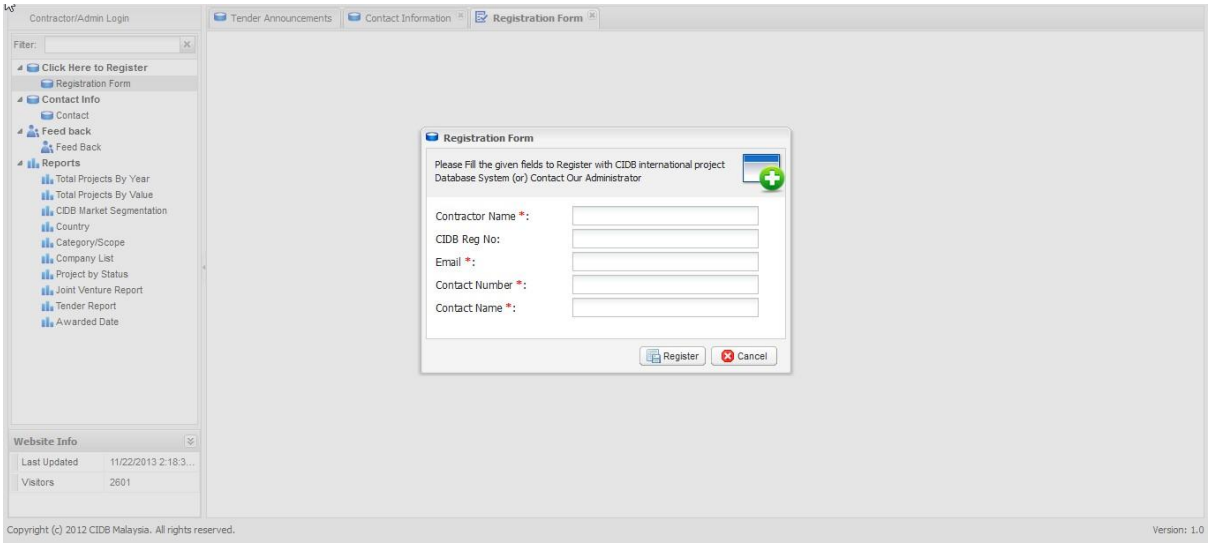


When user clicks on one menu from the left side, system will open that particular menu in its own tab / page.

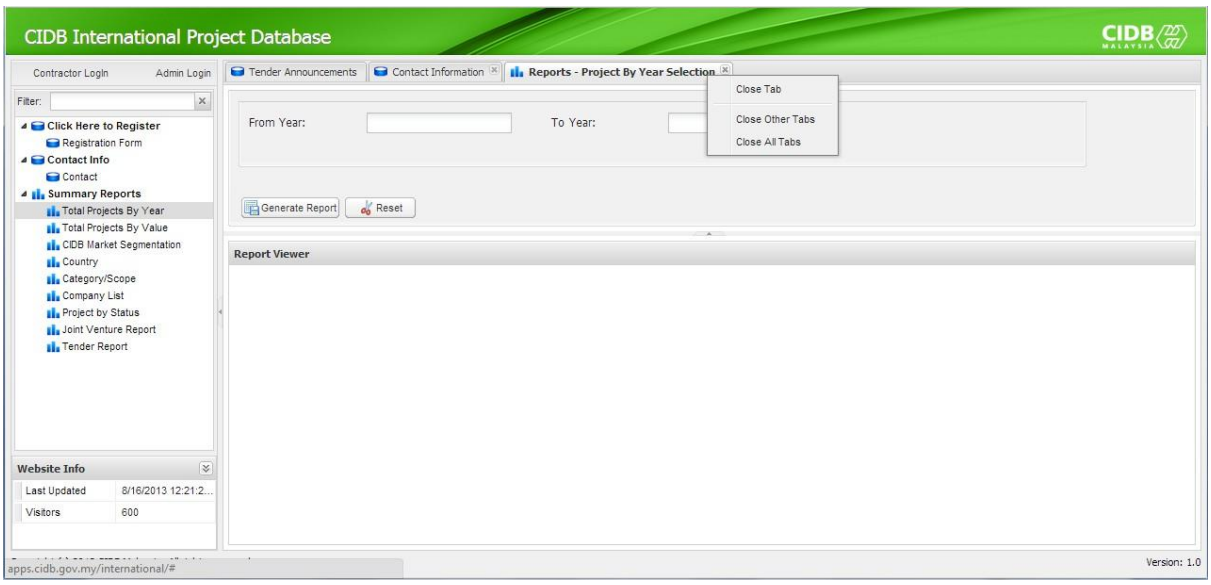


Upon user clicks on second menu from the left side, system will open that particular menu in a new tab without closing the first tab clicked.

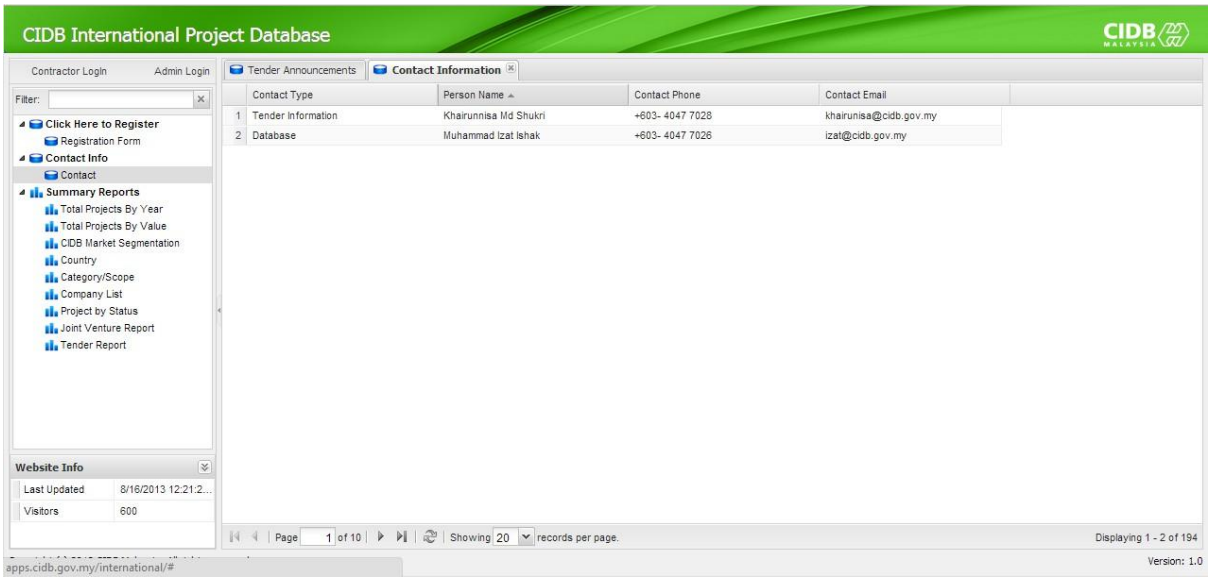
User able to clicks on more than one menu within one time.



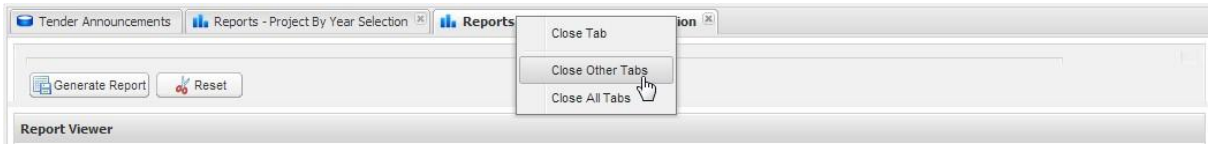
The arranged menu can be seen on the top of system screen.



User can right clicks on each tab to close it. If user selects Close Tab, system will close menu where user right click on it.

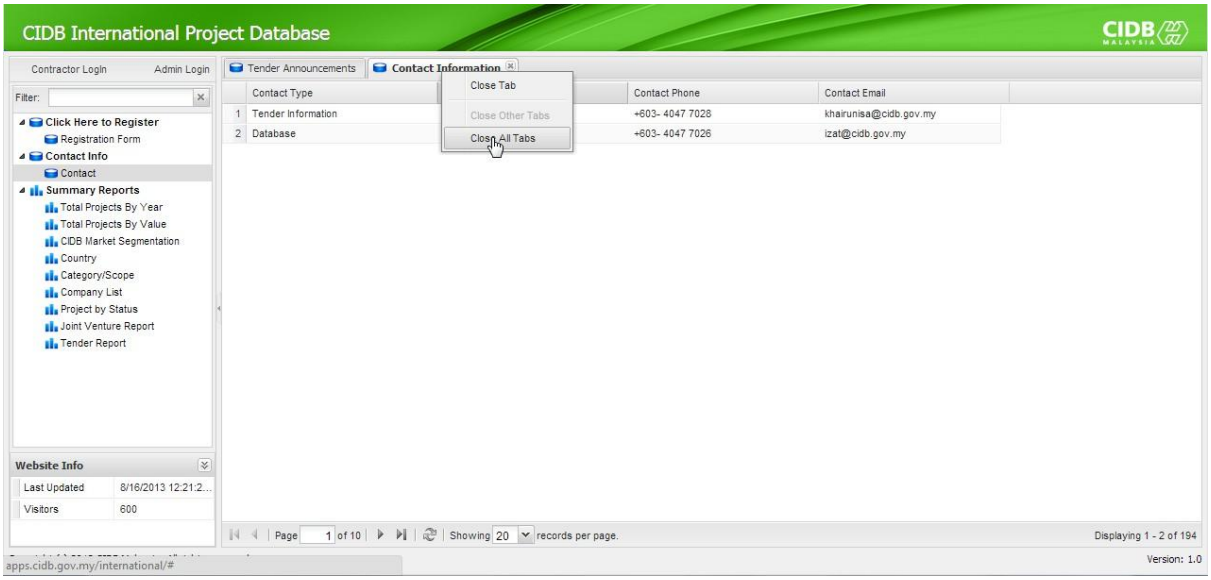


For example, user right clicks on Project By Year Selection and click close tab. So system will close Project By Year Selection module and remain the rest.

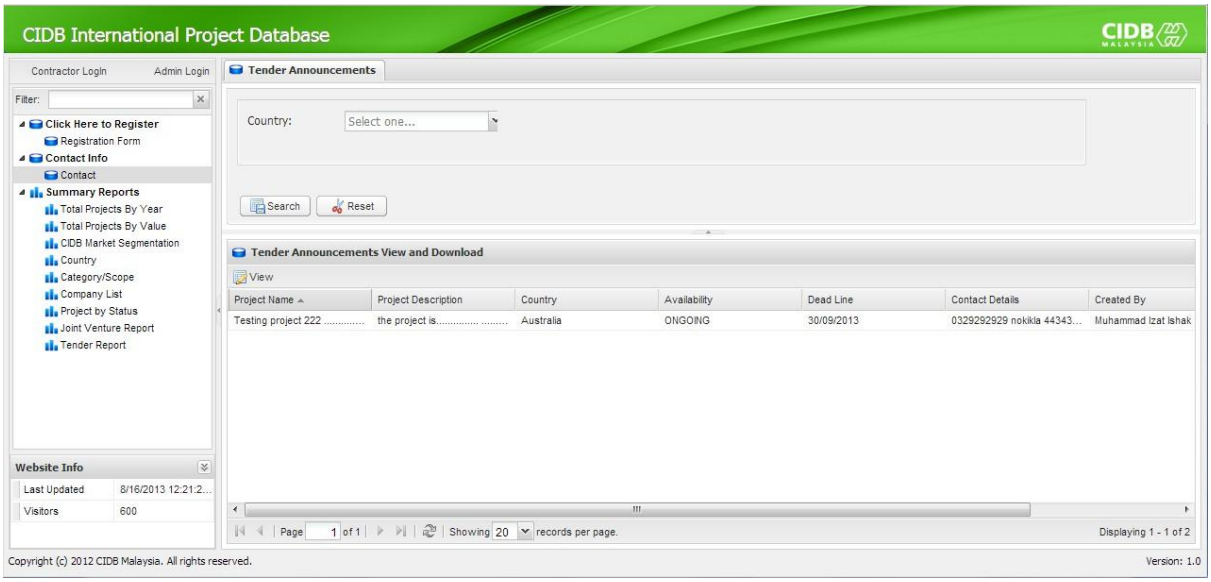


User can right click on each tab to close other tabs. If user selects Close Other Tabs, system will close other open module except menu where user right clicks on it.

For example, user right clicks on Project By Value Selection and click Close Other Tabs. So system will close all open menu except Project By Value Selection module.

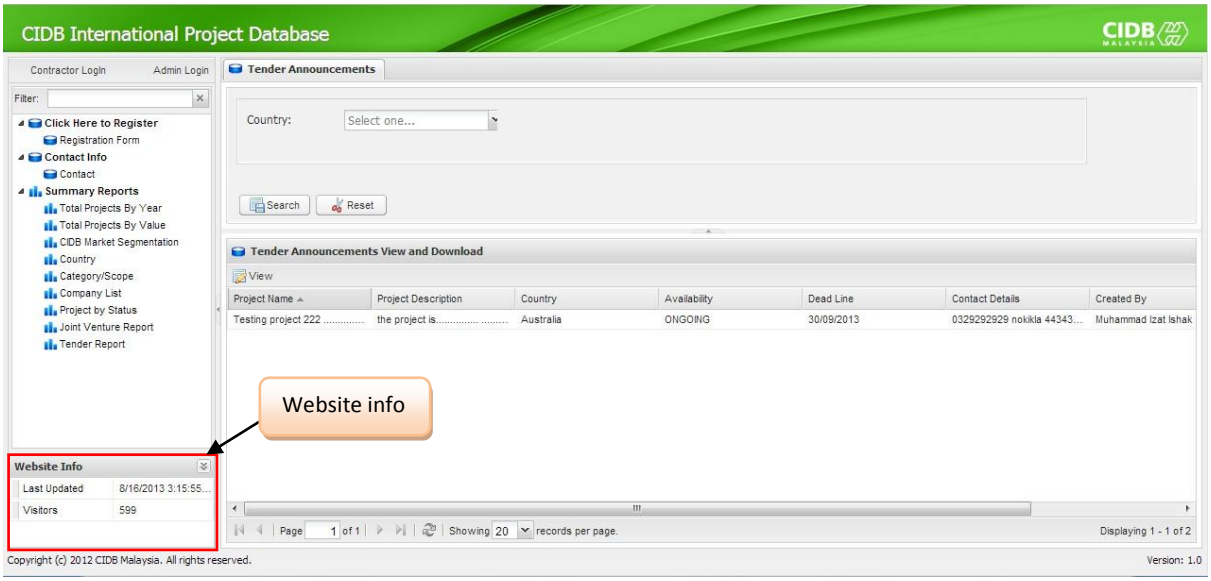


User can right clicks on each tab to close all tabs. If user selects Close All Tabs, system will close all open menus.



Once user selects Close All Tabs, system will close all open menus and listing view will be empty.

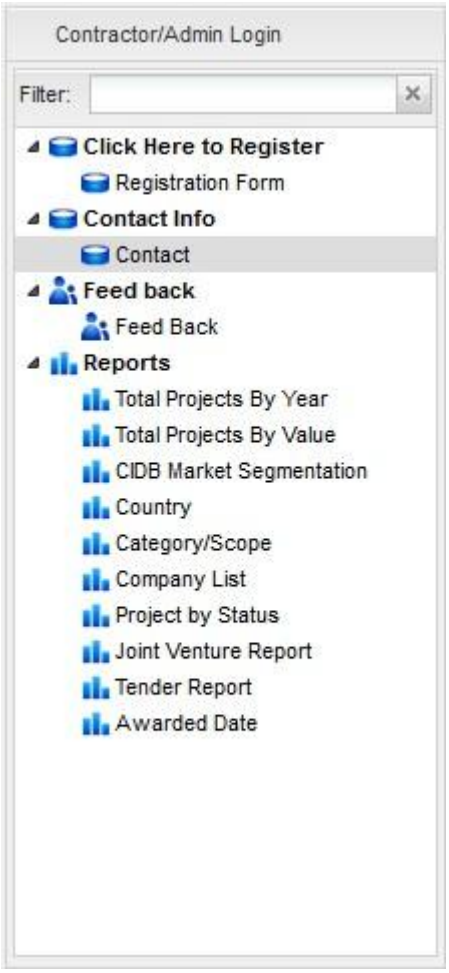
IPDRS system also provides website info as in the screen below.



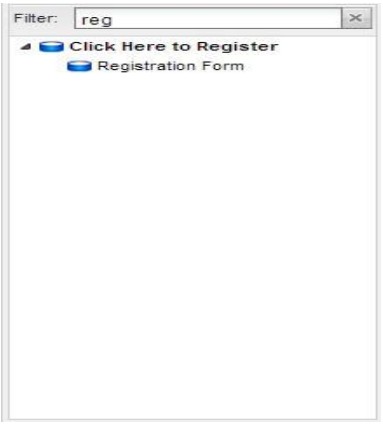
Screen above shows website information which are last updated and visitors. Last Updated indicate date and time last visit by user and Visitors indicate number of visitors have accessed IPDRS system.

3.5 Tree Menu

Tree Menu can be defined as menu listed on the left side of IPDRS System main page.

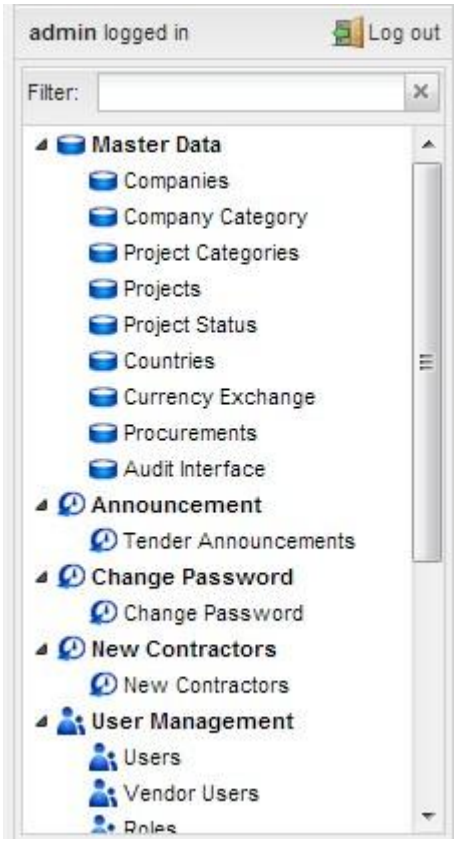


User is provided with several menus which cover up on several important modules in IPDRS.



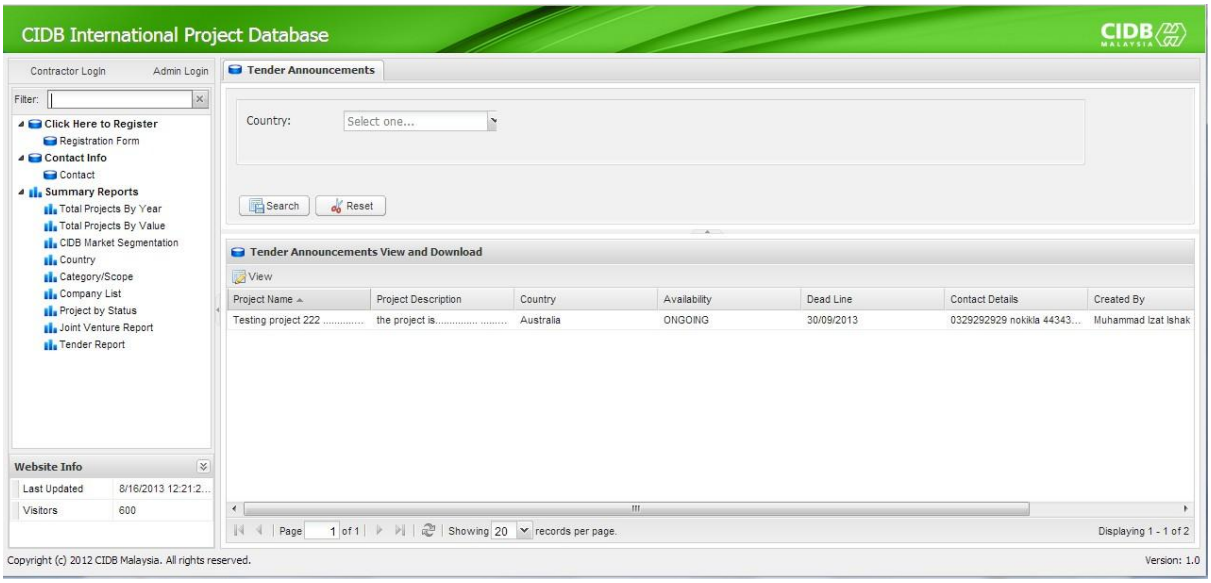
Upon user key in input in the Filter box, system will directly search for the related record exists in the modules. For example, user search for 'usage' word, so system will show all modules which consist of 'usage' word. When user searches for Master Module, the tree menu will expand the sub modules inside.

On the upper left side, there have logged in info and log out button. For logged in info, system will display name of user who currently access to the system.



System has Main Menu and sub menu. For example above, CDR is Main Menu / Module while CDR Unique Keys and the rests are sub menus / sub modules.

User can easily log out from system by clicks on Log Out button near Logged In Info.



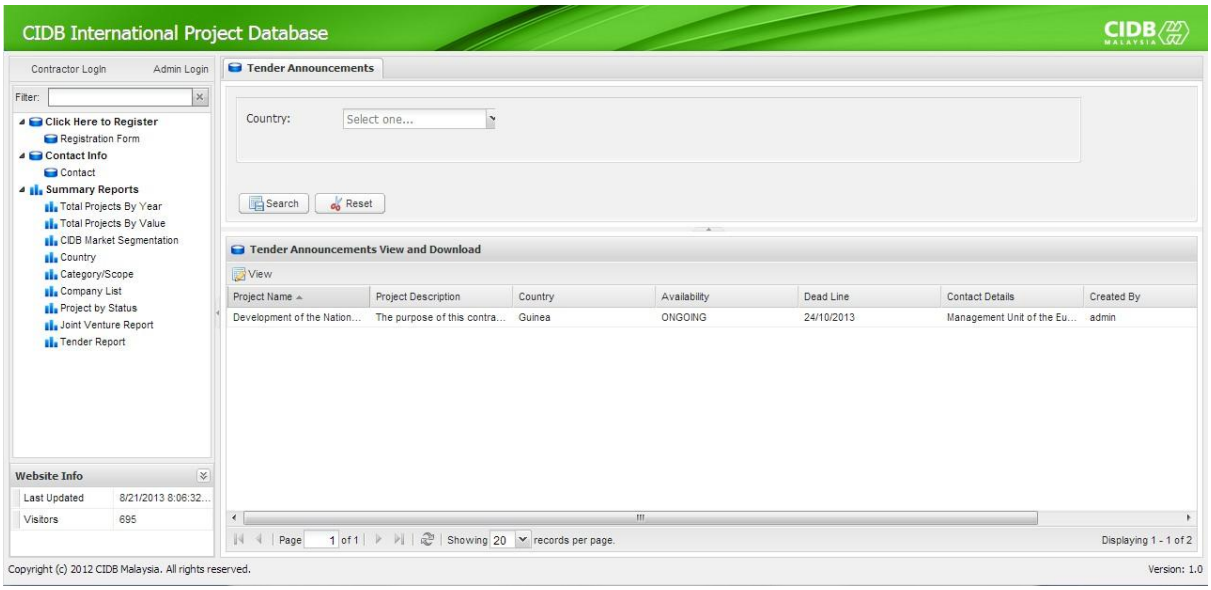
Upon user clicks on Log Out button, system will move user to system Login Page and user need to key in Username and Password again if user wants to re access back.

4. SYSTEM MANUAL

4.1 Tender Announcements

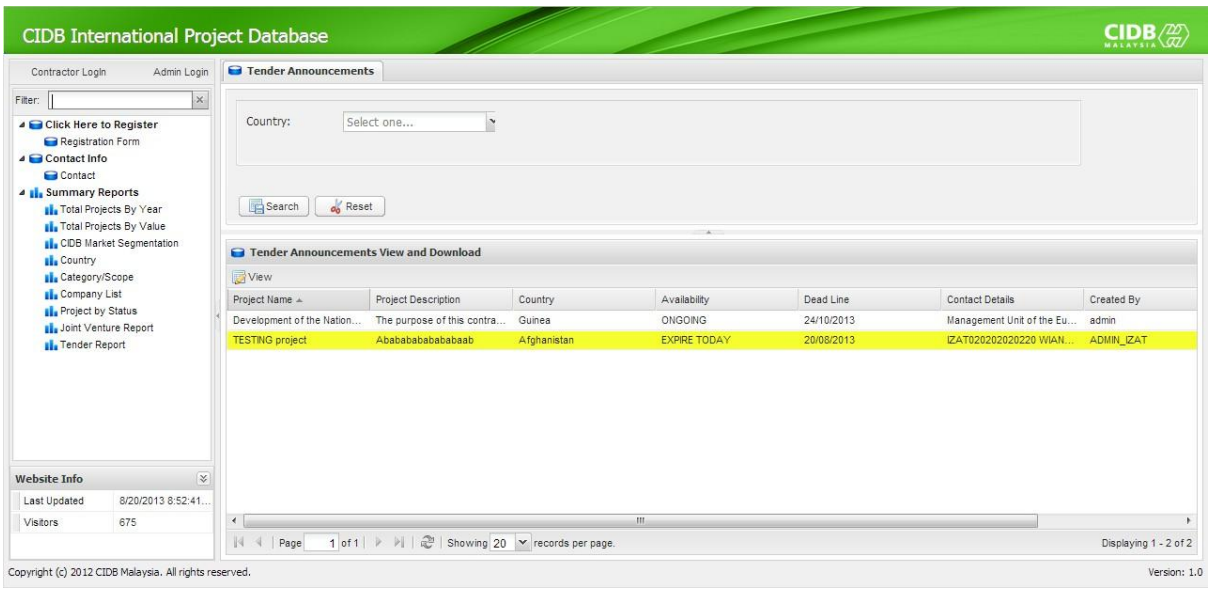
4.1.1 Open Tender Announcements screen

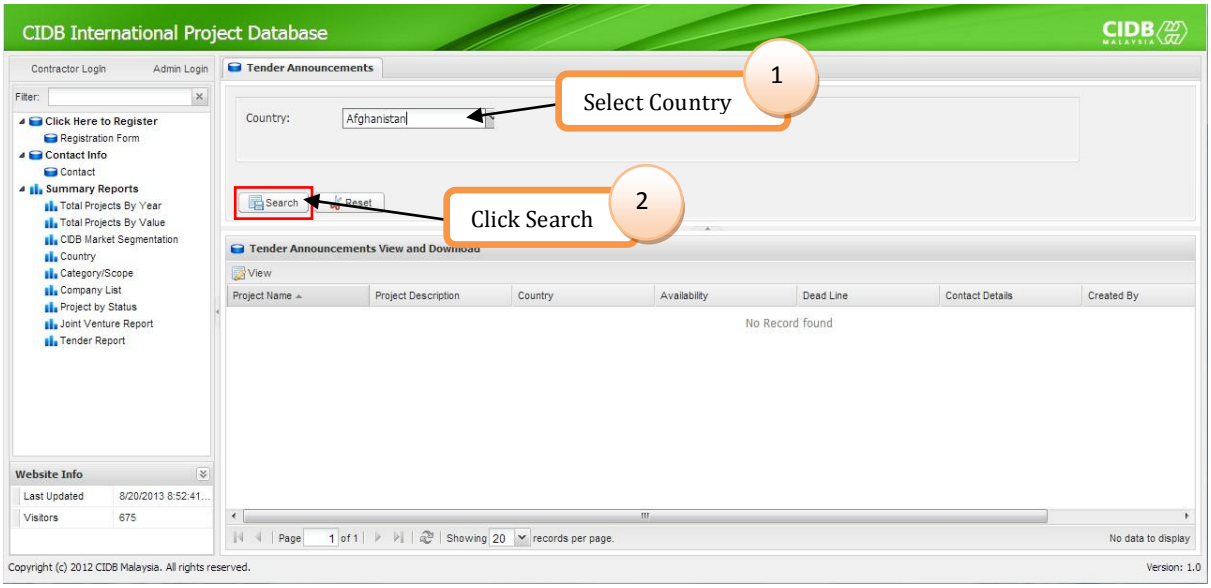
- Once user have login to IPDRS system, Tender Announcements screen will be displayed directly.



4.1.2 Search Specific Tender Announcements Record by Country

- Select Country
- Click Search button.

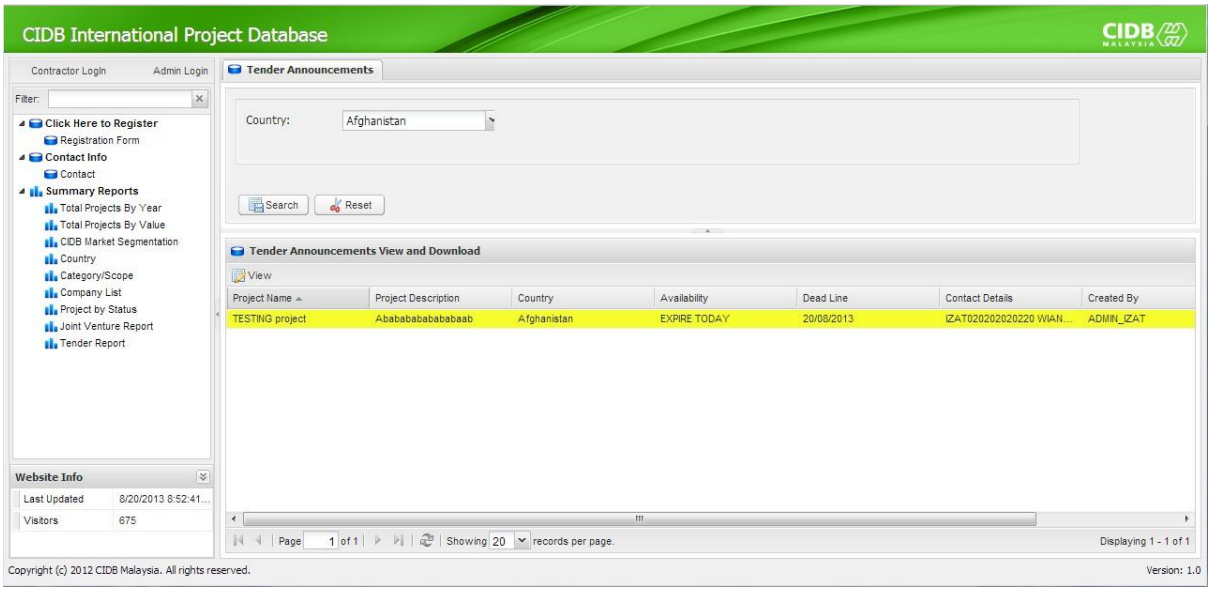




Follow the following steps:

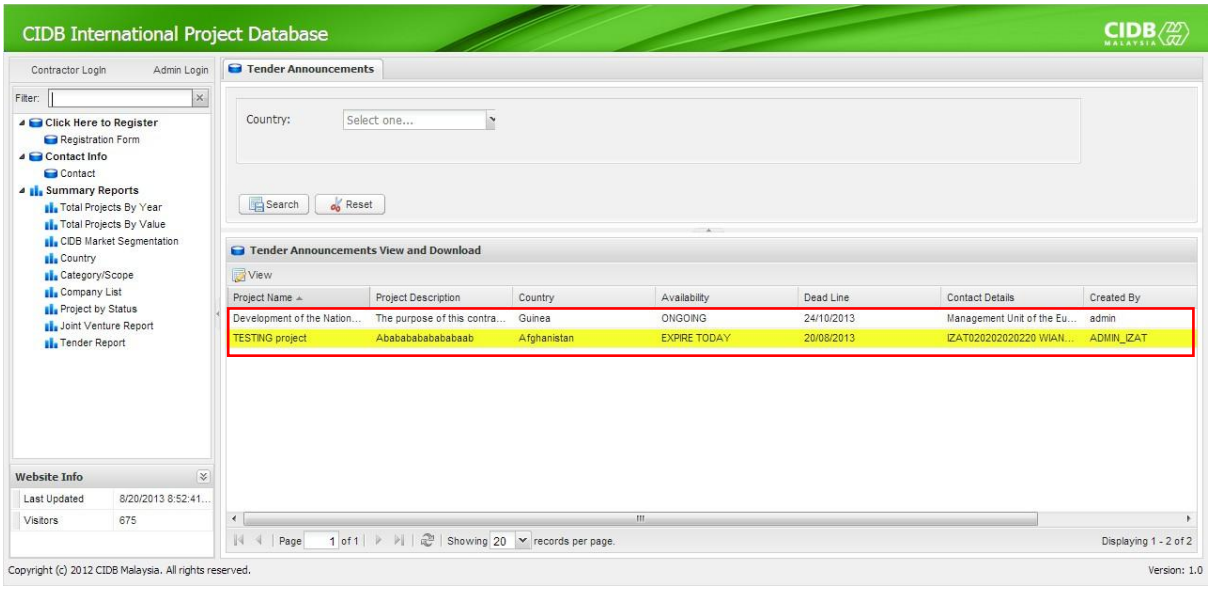
1	Select Country
2	Click Search

- The search result is displayed as screen below :



4.1.3 View List of Tender Announcements

- Once user have an access to the system. The list of Tender Announcements is displayed successfully to user.



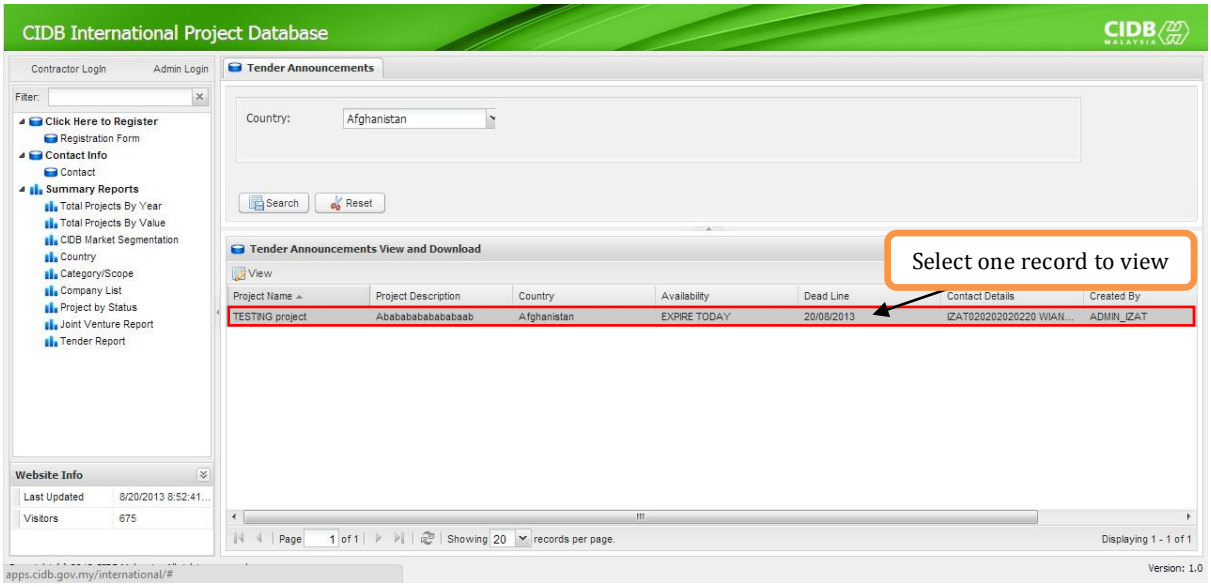
- List of tender announcements is viewed successfully by user.

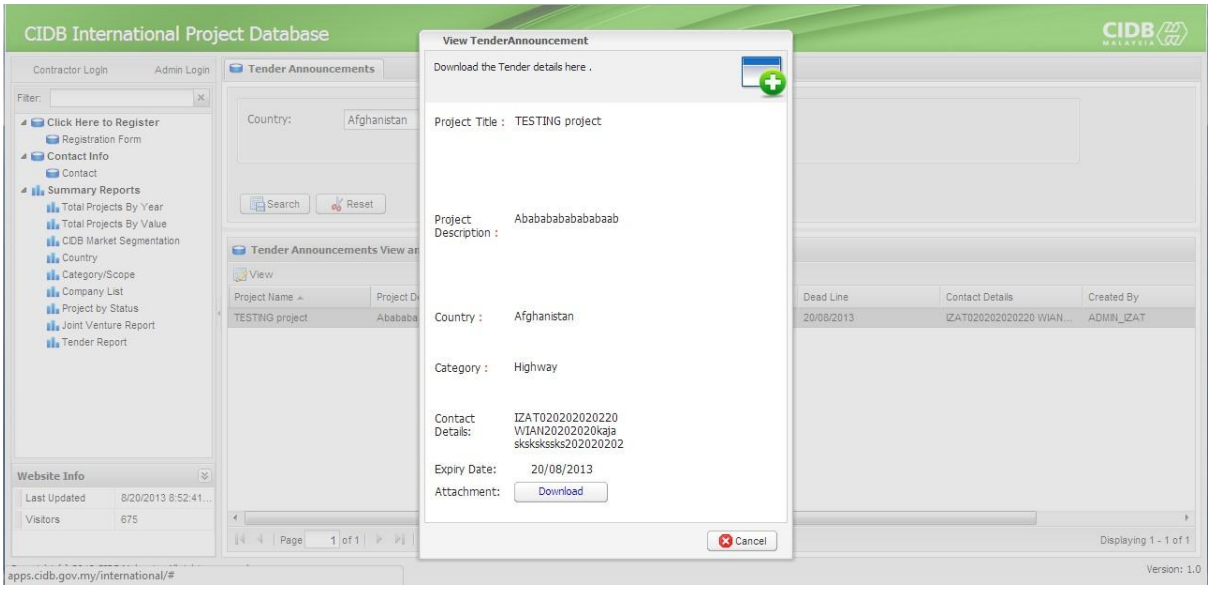
Notes:

- A yellow color record indicates that project will be expired soon (within a certain period), as shows in above screen.

4.1.4 View Details of Specific Tender Announcements Record

- Double-click the selected record on the panel or click View button 
to view its details.

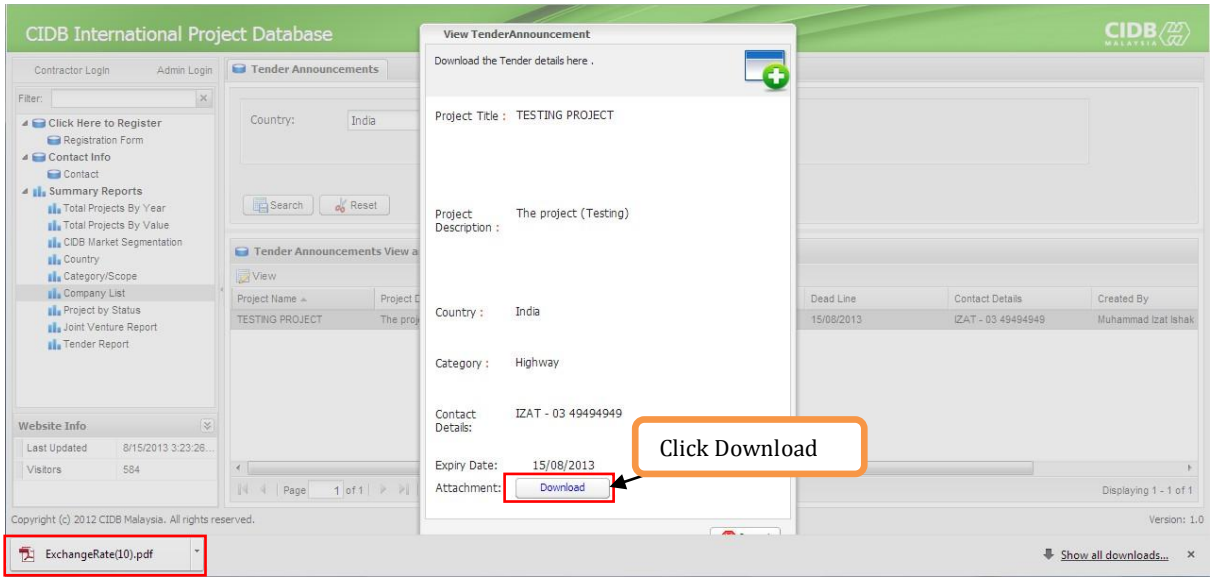




- A details of specific tender is viewed successfully.

4.1.5 Download Specific Tender Announcements Record

- Click Download button.

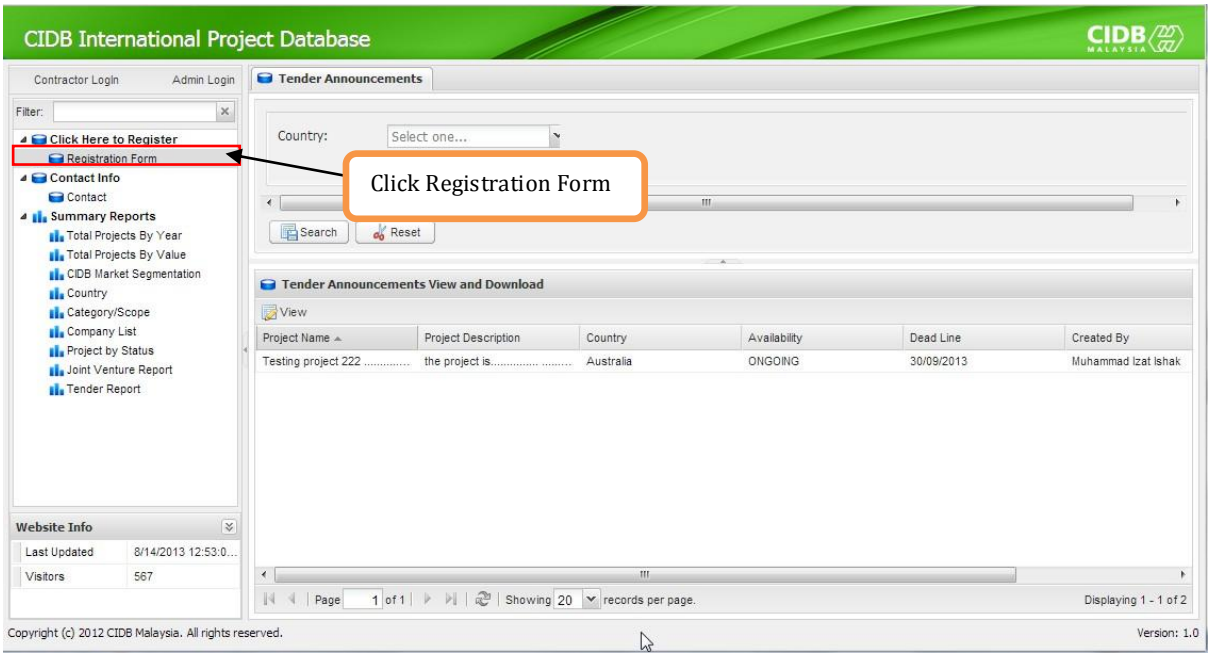


- The specific tender announcement document is downloaded successfully to user's local computer.

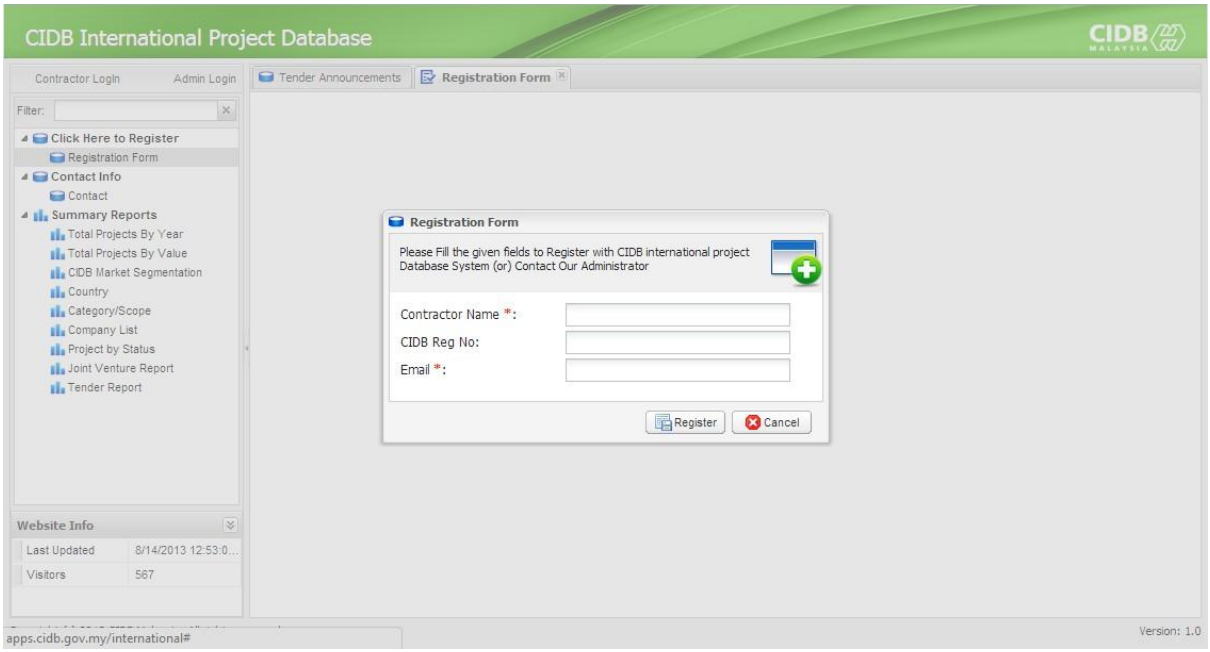
4.2 Registration

4.2.1 Open Registration Form screen

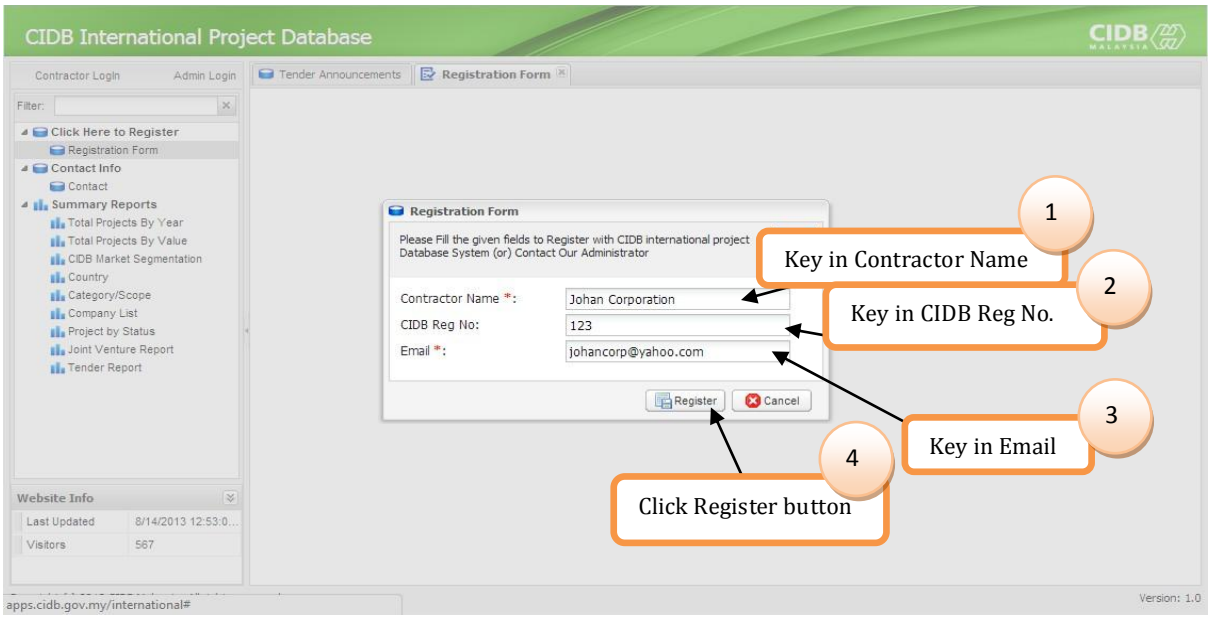
- Click Registration Form under Click Here to Register category on tree menu.



- Registration Form screen is displayed as screen below:

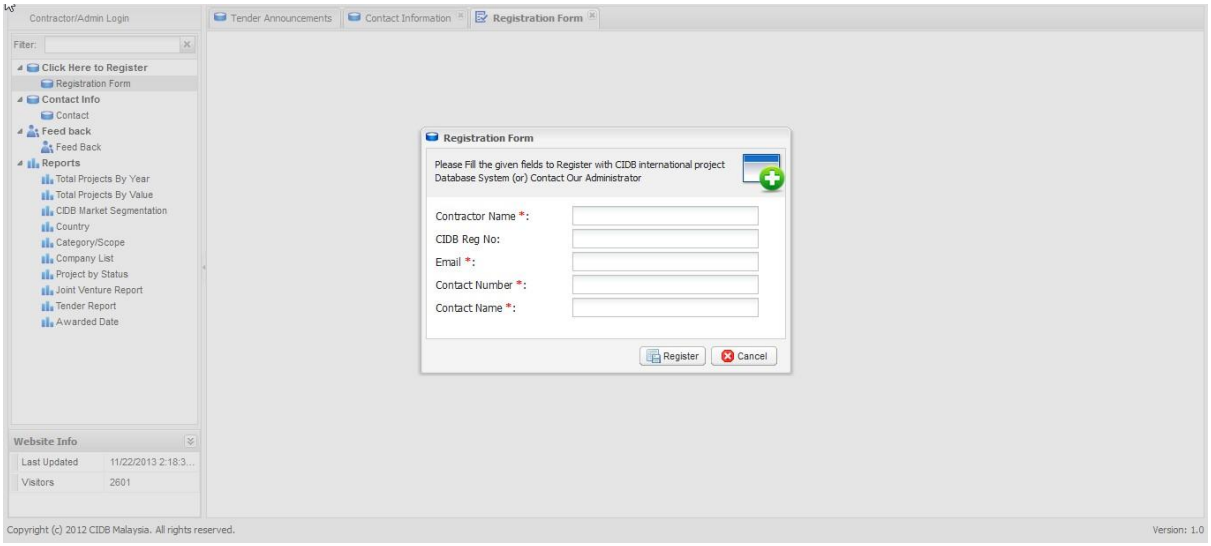


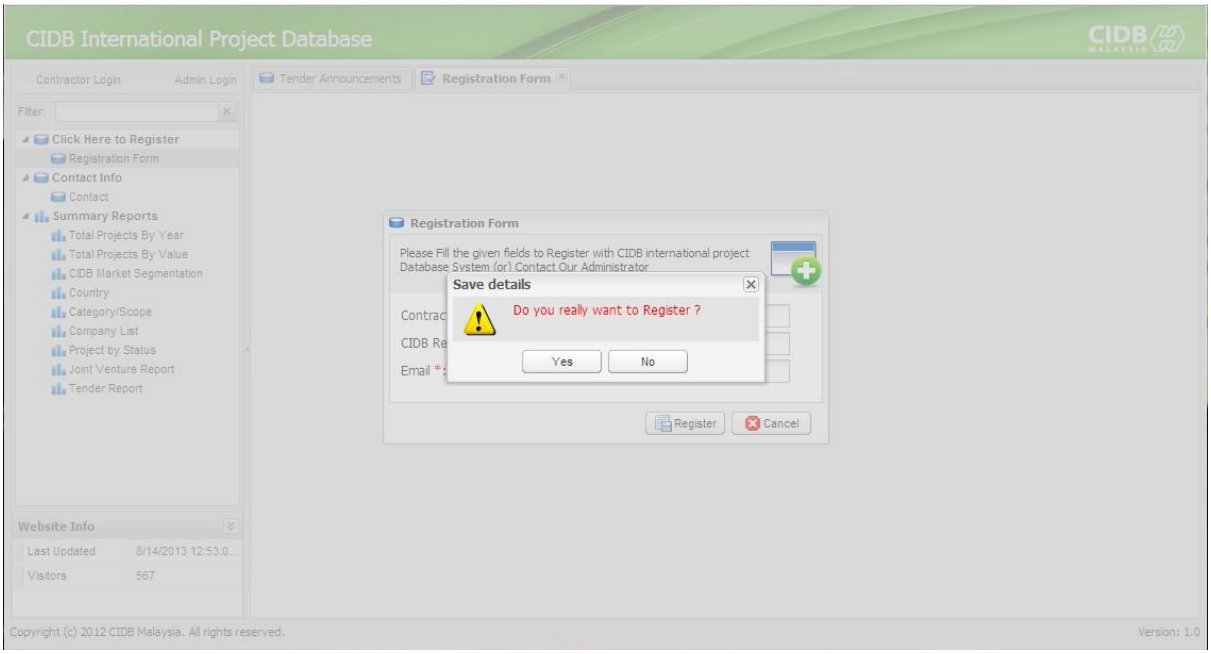
4.2.2 Fill in Registration Form to Register



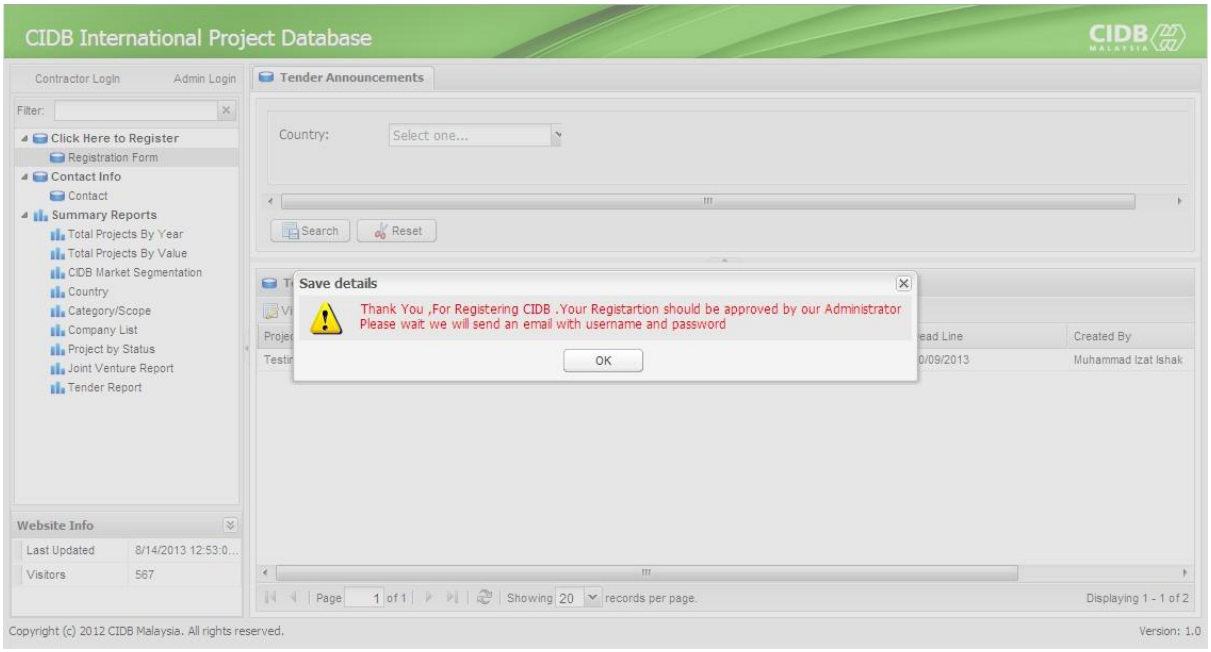
- Follow the following steps:

1	Key in Contractor Name
2	Key in CIDB Registration Number (No.)
3	Key in Email
4	Click Register. Click Register button, new user is registered successfully.





- Screen above shows confirmation message is displayed to continue the registration process. User needs to click Yes button to proceed the registeration or click No to cancel the registration process.

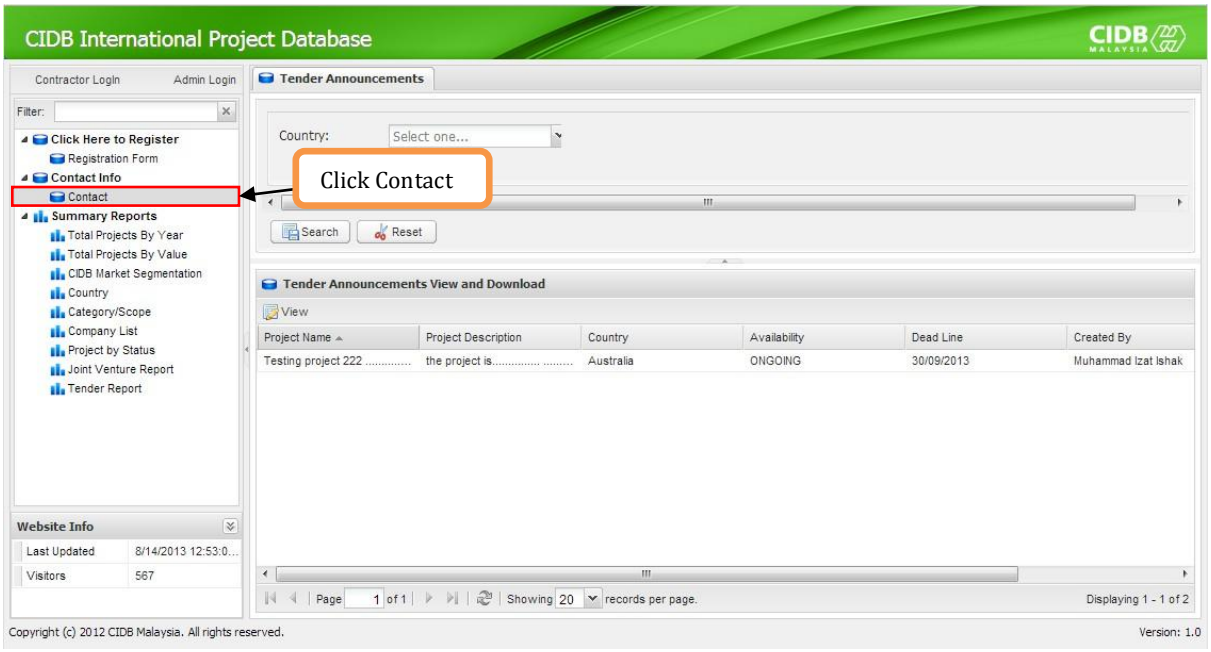


- New user is registered successfully into IPDRS system.

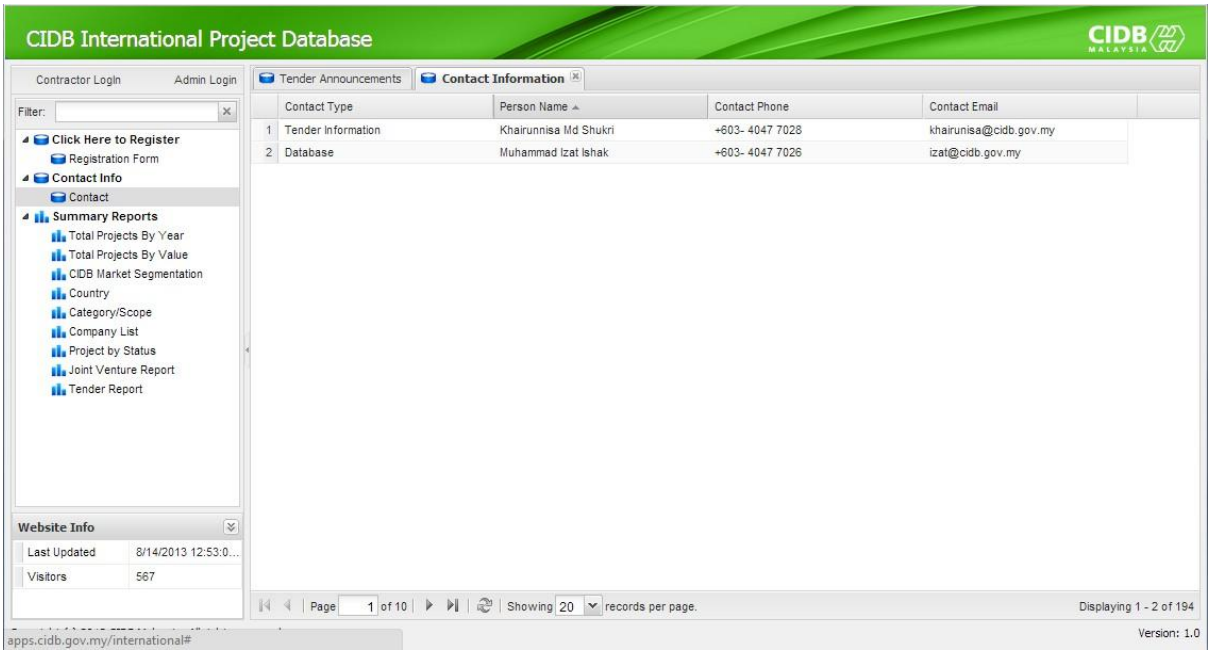
4.3 Contact Info

4.3.1 Open Contact screen

- Click Contact under Contact Info category on tree menu.



- List of contacts is displayed as screen below:

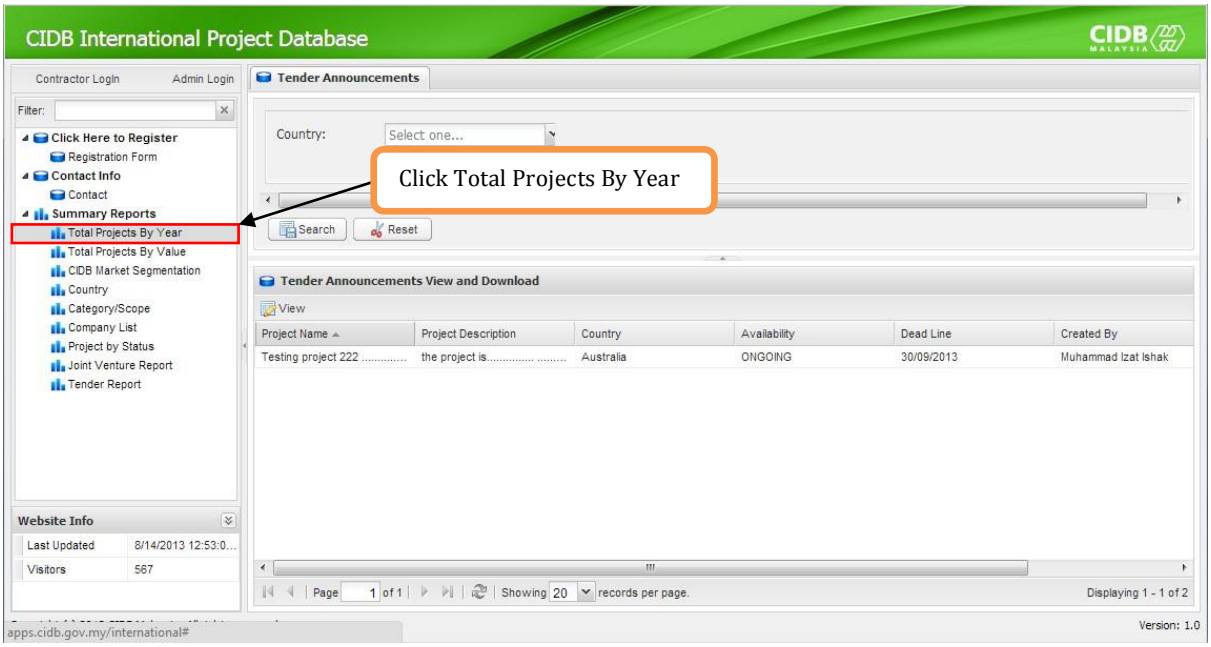


4.4 Reports

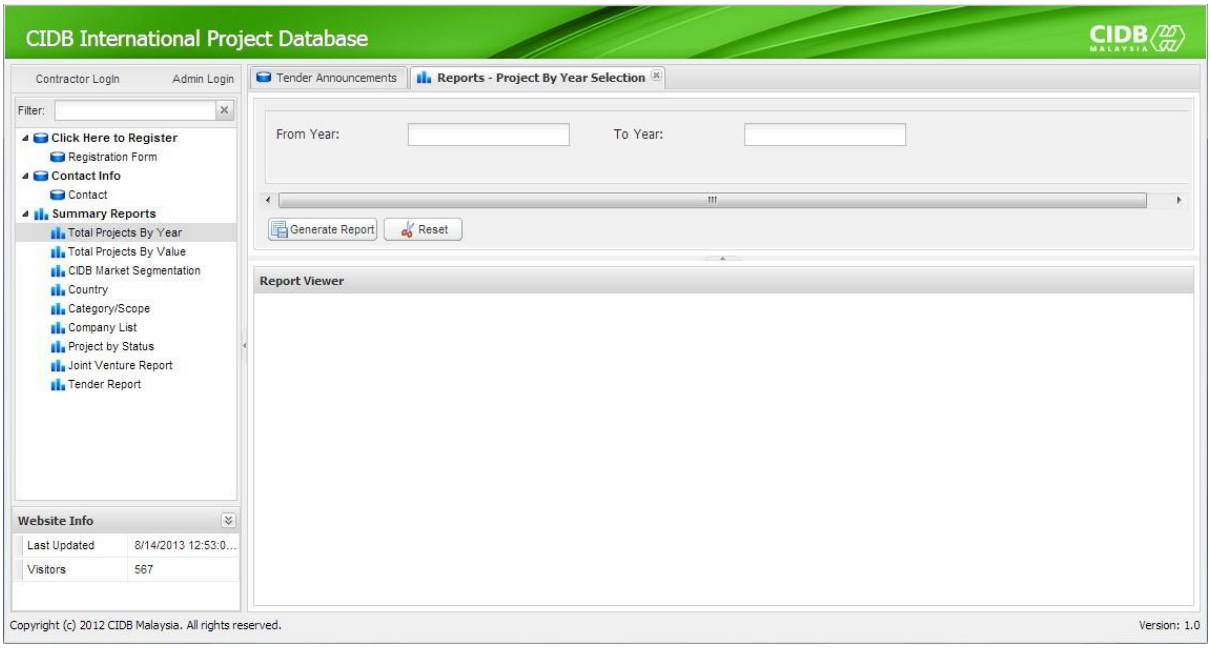
4.4.1 Total Projects By Year

4.4.1.1 Open Total Projects By Year screen

- Click Total Projects By Year under Reports category on tree menu.



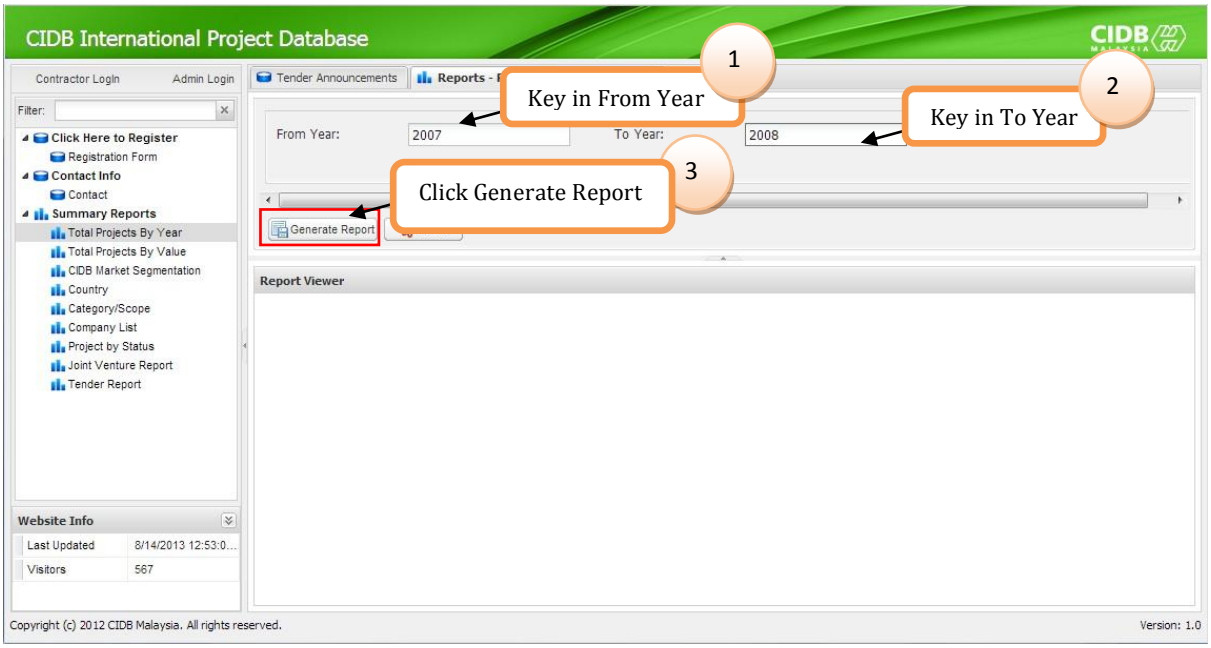
- Total Projects By Year screen is displayed as screen below:



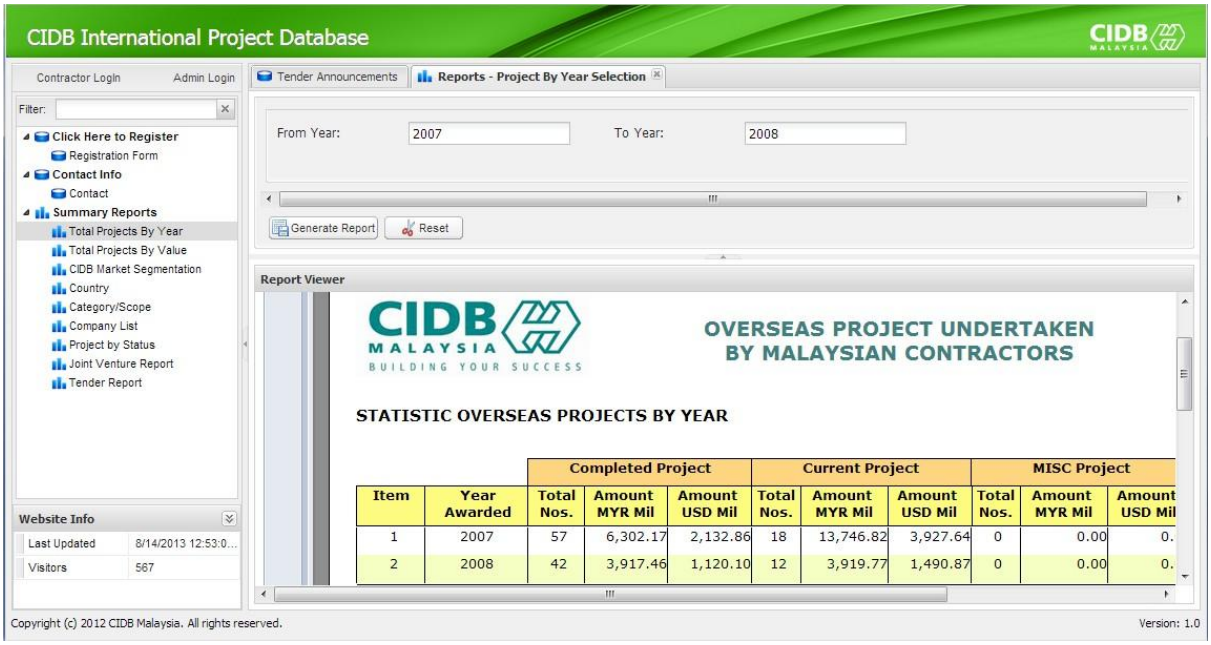
4.4.1.2 Generate Total Projects By Year Report

- Follow the following steps:

1	Key in From Year on the search panel as per screen below
2	Key in To Year
3	Click Generate Report. Click Generate Report button, the report is generated successfully.



- Statistic Overseas Project By Year Report is generated as shown on screen below:

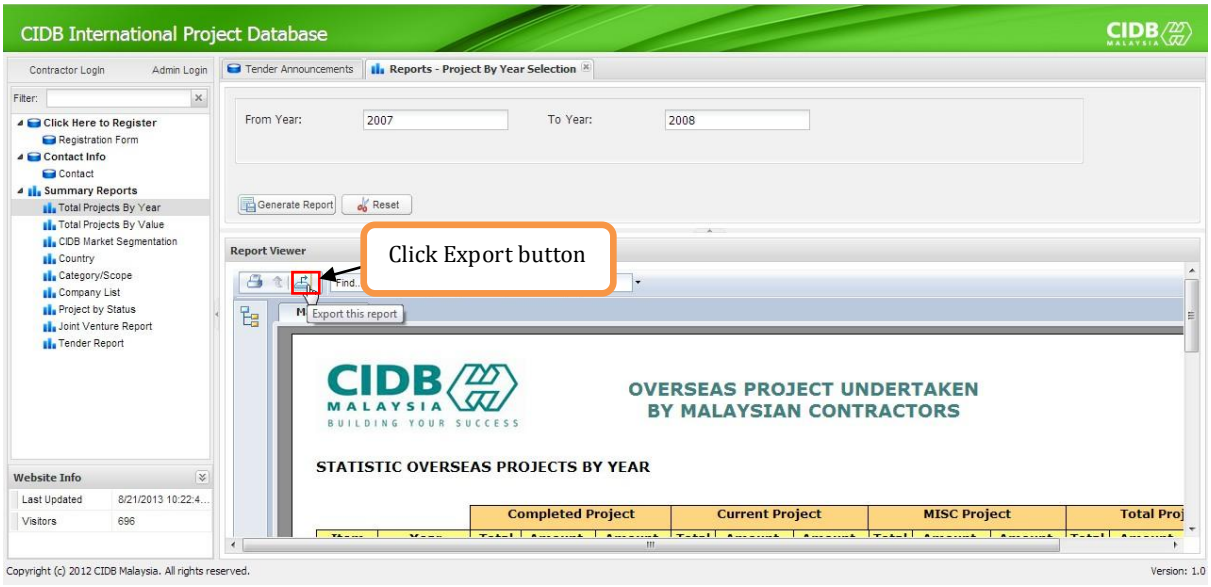


4.4.1.3 Export Projects By Year Report into Multiple File Format

As an example in the screen below is to export the Total Projects By Year Report into Excel file.

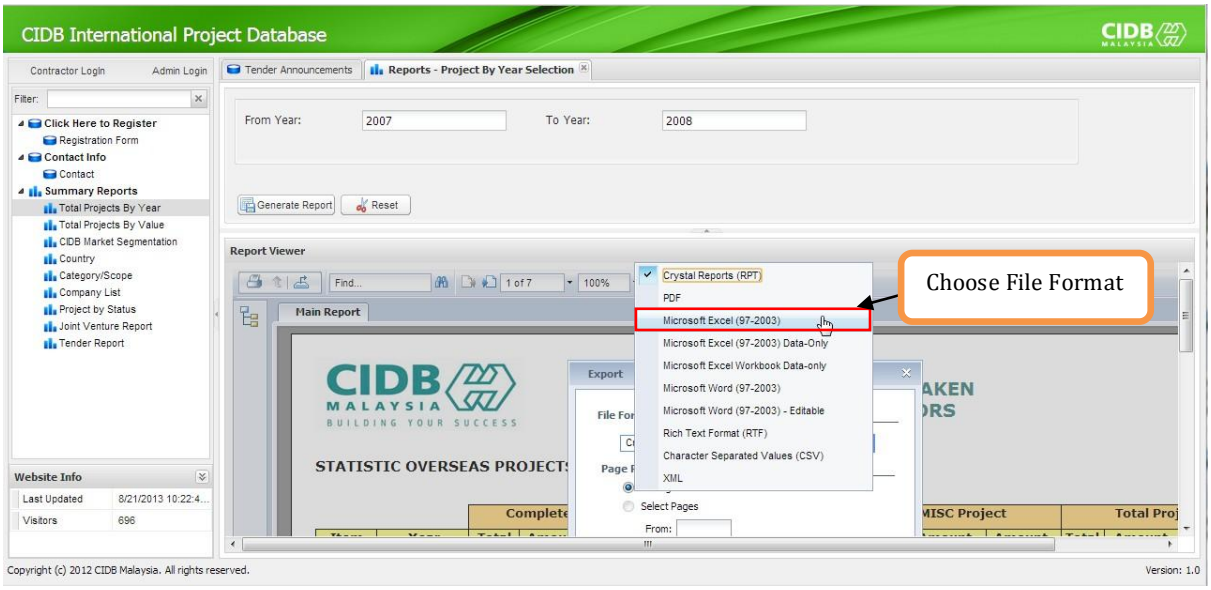
Follow the following steps:

i. Click Export button.



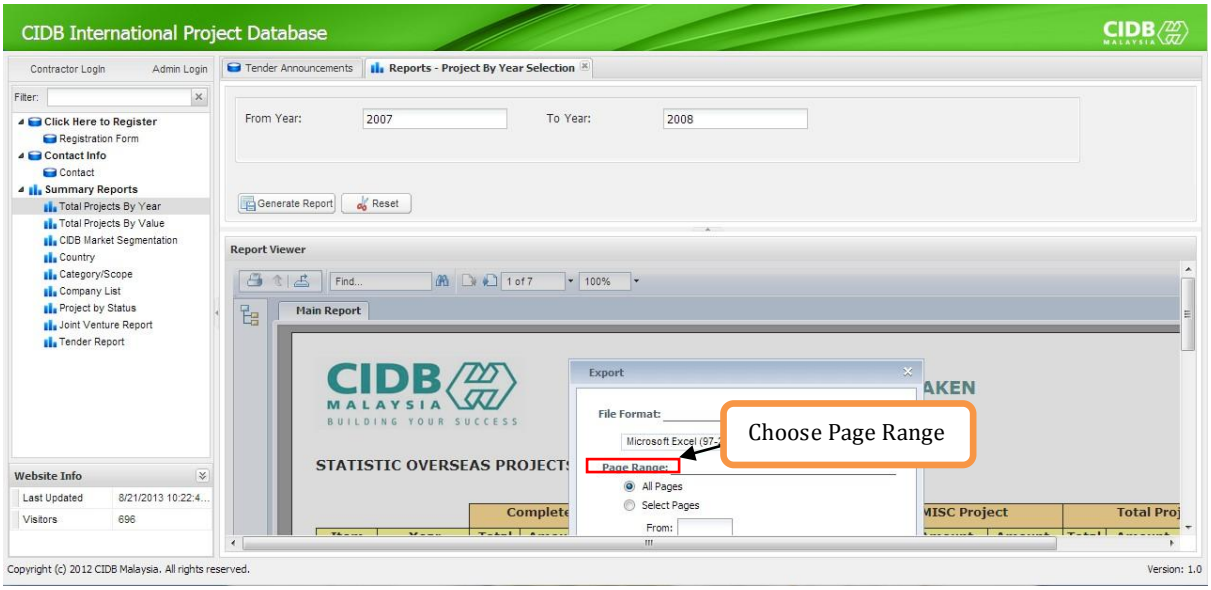
ii. Pop up window to export report is displayed.

iii. User must choose which file format to be exported.

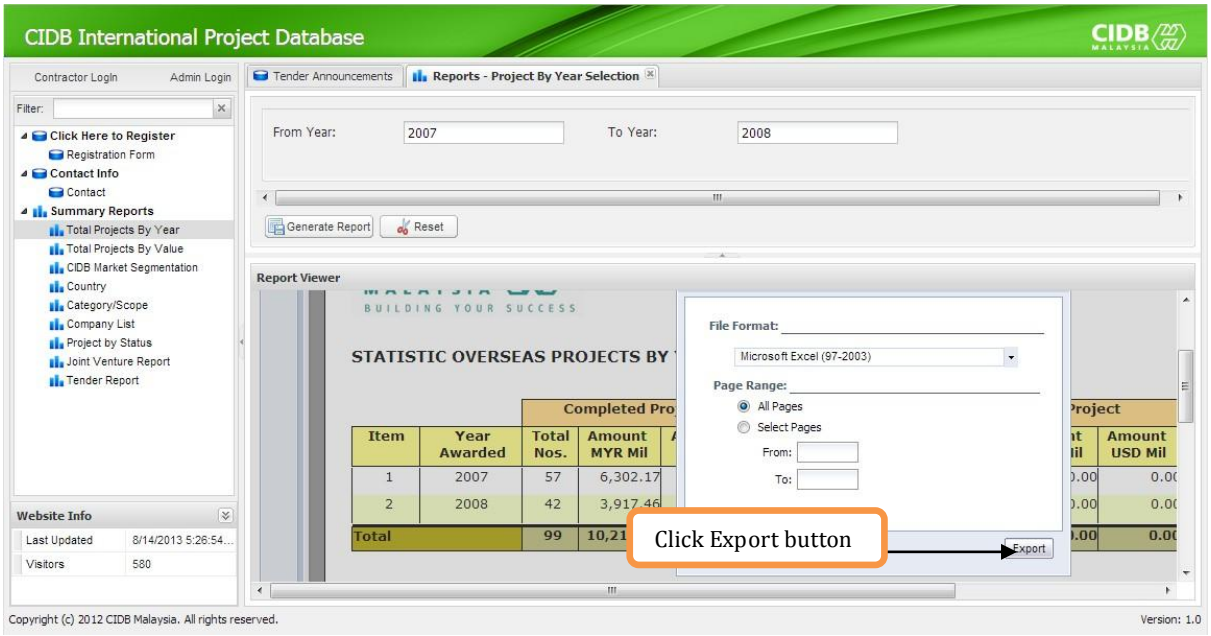


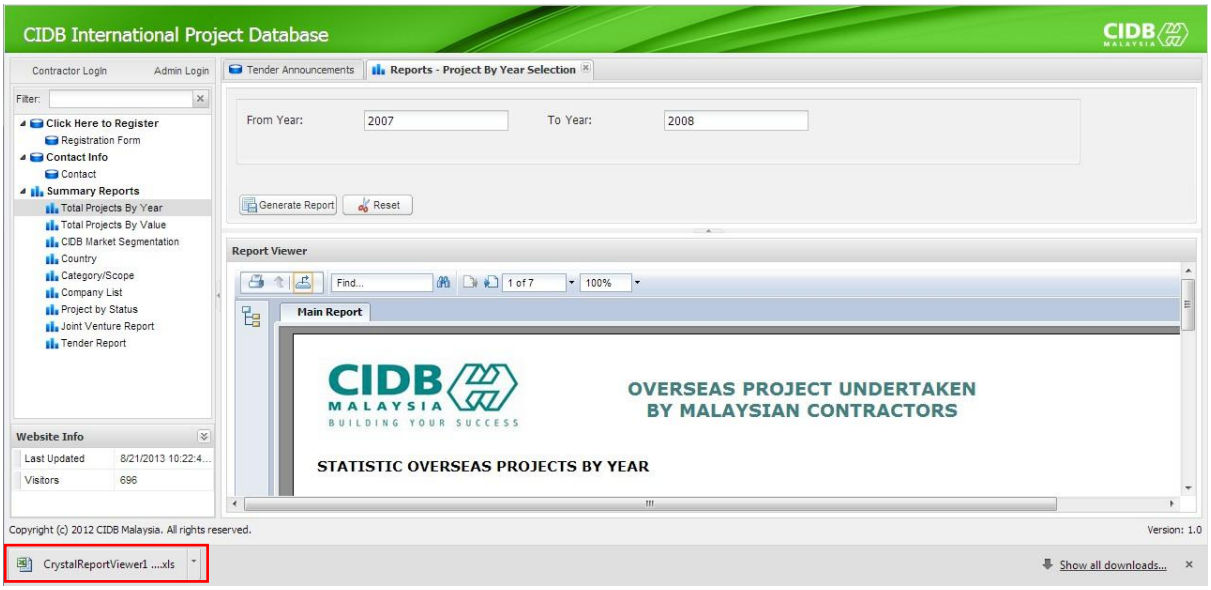
iv. User needs to select page range either all pages or selected pages

v. If user choose page range as selected page, then user must specify from page and to page (as per request)

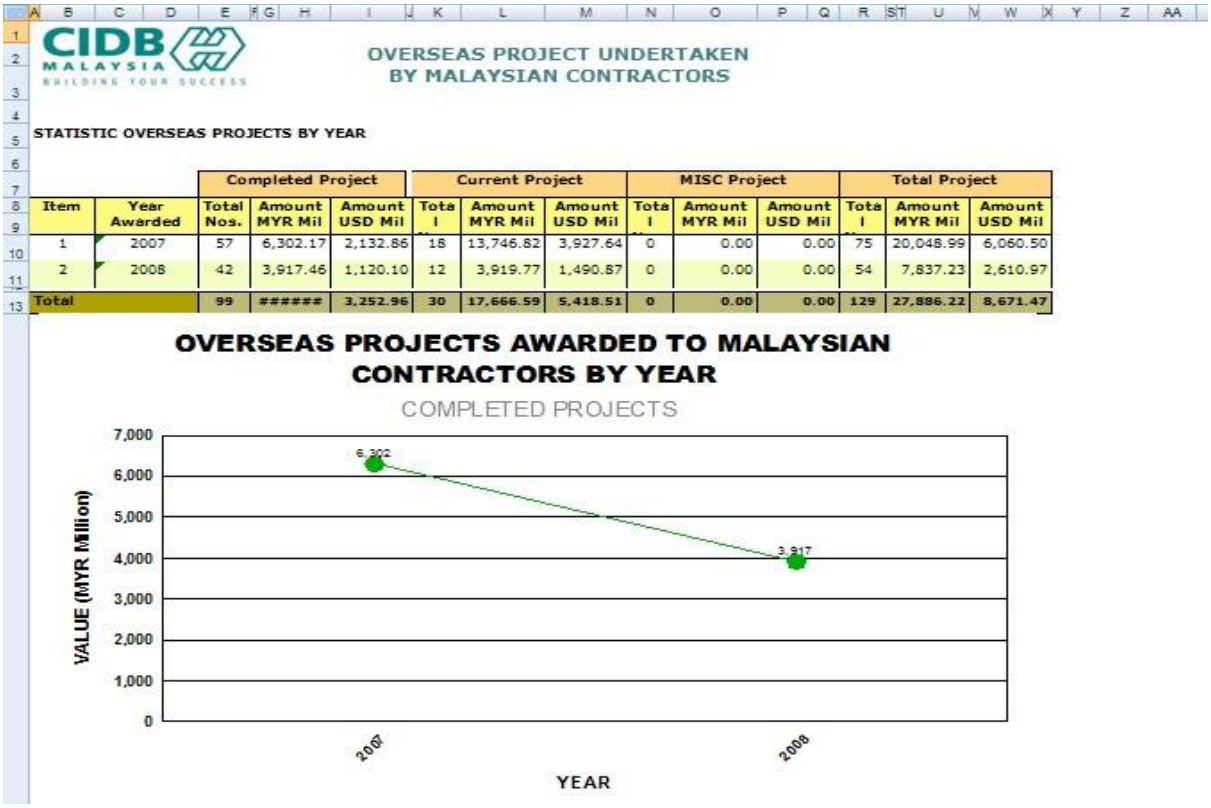


i. Click Export button.





- Screen above shows, Statistics Overseas Projects By Year Report is exported into Excel file successfully.
- Screen below shows an Excel file that contains all the report details.



Item	Year Awarded	Completed Project			Current Project			MISC Project			Total Project		
		Total Nos.	Amount MYR Mil	Amount USD Mil	Total	Amount MYR Mil	Amount USD Mil	Total	Amount MYR Mil	Amount USD Mil	Total	Amount MYR Mil	Amount USD Mil
